U.S. Army Corps of Engineers.
DEIS hearing

Oct. 24, 2016

To whom it may concern:

What is the U.S. Army Corps of Engineers doing to defend our water, our air, our soil? Your answer, and its timing are critical because this is not simply a matter of economics. It is a matter of environmental destiny, and officials NA state and U.S. policy should not be pitted against environmental destiny.

Like indigenous peoples, we need to learn to live in a place without exhausting and/or ruining the resources. Asking the people to weigh in on a decision regarding the Longview coal terminal has come to be known as "just envied." But we are at a spiritual awakening in creation care — a "come to Jesus" moment, if you will.

I am writing to urge you to protect our region and say "NO" to coal exports in Longview. It is my sincere prayer that no one should ever have to hear their Maker say, "What more can I do for you? You've already received your resolution." Amen and Amen.

Thank you for your time,
