Dear U.S. Army Corps of Engineers,

I am a retired elementary school teacher, wife, mother, grandmother and friend to many. I love life! Don't you?

I beg you today to take "no action" on Millennium Bulk Terminals' facility in Longview, WA. I don't live here, but I am – as are you – a citizen of planet Earth. I share – as do you – our interlinked atmosphere, oceans, land masses, fresh water sources and incredible beauty of Earth.

400 ppm of $CO_2$ in our shared atmosphere was surpassed in 2015, I believe. 1.5°C rise in global temperatures was touched this year and, if we continue with fossil fuel extraction & use as usual, will be surpassed. Climate instability and ocean acidification will increase... Please forgive me if you know all of this and more!

If you <u>do</u> know in depth about the many consequences of human-released carbon emissions, please act to stop this export terminal. If you do not, I ask you to inform yourselves, for your own sake, for the sake of your loved ones and for the sake of all future generations. Protect us all – say no to this project!

Thank you for listening.
