The DEIS ignores the impacts of Millennium's rail traffic along the whole rail route. This includes our home in Camas. Noise pollution does adversely affect health, including adverse effects on heart disease and strokes. This has been documented in Scientific papers, including a ~~comprehensive review by the American Heart Association~~ paper in Epidemiology 2009.

Diesel particulate matter also adversely affects health →

as documented by the American Heart Association, "Circulation" 121: 2331-2378

We built a house in Camas in what was a quiet, unpolluted area. I am very concerned that the proposed coal trains will increase cardiovascular and other health effects on all Camas residents.

There is no safe threshold of diesel particulate matter.
