PLEASE SHARE YOUR COMMENTS BELOW:

Everything negative is being sold as a jobs project. There are many ways to create and sustain jobs; destroying the environment and all life on the planet should not be one of them. There is nothing good about coal, from mining, shipping, burning and the fallout from all of it in our water, air and soil. The profit is private and the damage and cost is public.

The elite and ~~wealthy~~ wealthy are fleeing China because they can no longer breathe well. It won't be long until China changes its environmental

(additional space is provided on the back)

(comment continued)

and fuel laws to phase out and eventually ban burning coal. They can't afford to lose their elite and the country as a whole is unhappy ~~with the~~ with the quality of their air.

Shipping coal is anything but a local issue as there is environmental damage at every step of the way.

Please stop the process of shipping coal. Exporting is <u>not</u> the issue. <u>Coal</u> is the issue.
