RE: MBTL Scoping

A) include survey of the combined-cycle combustion turbines that China is using for their electricity-generating facilities:
• Siemens • Mitsubishi • G.E. • other

B) determine approximate "% flow" of coal to electricity generation vs. other uses in: • China • other Asian countries

C) making note of the WA state CCCT facilities as noted in Dept. of Commerce publication by the state energy office of the 14 → determine what county and city agencies have determined "ideal" or "adequate" parcels for building new CCCTs, using some of the coal from either MBTL or Pacific Gateway deliverables.

D) determine number of usable train car-covers to stop coal dust exposure @ loss.
