Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Allyse Heartwell, San Francisco, CA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rick Lewis, ennis, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Todd Tanner, Bigfork, MT, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ryan Wallace, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Kathryn Plitt, Gig Harbor, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joy LaClaire, Helena, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I am strongly opposed to the construction of a coal export terminal at Longview, WA. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Randall Collins, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gregory Severson, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Darius Mitchell, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rae Randleman, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Power, Edmonds, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, 350 parts per million of carbon dioxide in our atmosphere is what many scientists, climate experts, and national governments are now saying is the safe upper limit for sustainable life on earth. For many thousands of years before human industrialization it was 280 parts per million. Because of our massive burning of fossil fuels, we are now at 400 parts per million and rapidly rising. This is similar to the Permian period approx. 250 to 300 million years ago when huge volcanoes in what is now Russia raised the CO2 level to 900 ppm (parts per million) and the mean surface temperature 2 degrees C above modern level. Oceans rose significantly above modern levels, lost their oxygen and emitted deadly hydrogen sulphide gas. Nearly 90% of marine species and 70% of terrestrial species died out. It would take millions of years, well into the Triassic period for life to recover from this catastrophe. Stopping this destruction of our planet is the most important issue of our time! We have got to stop burning fossil fuels as fast as possible. Solar panels for homes now are affordable and make economic sense. Electric and electric hybrid cars are rapidly developing, becoming more affordable and becoming a compelling buying decision. Buildings can be made much more energy efficient. Unfortunately most Republicans are bought and paid for by the fossil fuel industry. We must vote them out of office. We all must do our part to stop burning fossil fuels! See http://vimeo.com/28991442. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joel Carlson, Lacey, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Bonar, Kalama, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Daniel Brackett, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steve McKee, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tom Harding, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bruce von Borstel, Sequim, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Martha Shade, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James S H Smith, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Martha Thayer, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amy Tsui, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The coal export terminal encourages dangerous pollution from coal dust. It will guarantee adverse climate and air pollution effects when the coal is burned, causing particulate, mercury and climate pollution that will affect Washington. I urge you to consider these impacts in the scope of the Environmental Impact Statement, and deny construction of the terminal. Thank you,
—Derek Dexheimer, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Peter Hodum, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jessica Spear, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sharon Leishman, Cascade, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Erlander, Freeland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Charles Landau, Port Townsend,, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This would a "double whammy" for us here in the N'West.Not only would coal dust be on the ground, in the air, etc, the trains would quite possible interfere with emergency vehicles trying to get somewhere and having to cross at a grade crossing. The second whammy would be that we are already getting pollution from the Orient as this is the way the atmosphere moves. DON'T DO THIS! ! Doris Lee This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Doris Lee, Spokane Valley,, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. —Jared Howe, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Arlene Golladay, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nolan Salix, Dillon, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Hahn, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David R. Montague, Bonner, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Russell La Claire, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. —Karen Suwinski, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Sheridan, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Marysville, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Randall Page, Port Angeles, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda & Peter Rhines, Adelma Beach, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. You're going to get thousands of comments on this, which shows how much Washington citizens care about the future of our region and our world. There is immense institutional resistance to the idea of looking at the big picture when completing environmental studies; it seems like the state DOE is most ready to do so, while the ACOE resists the idea. Yet citizens demand that you look at the big picture. It's a different way of thinking and breaks with a long tradition of government studies looking only or primarily at the short-term and local impact of projects that wreck the earth. It's time to get serious about including global and long-term impacts when studying energy projects. Therefore, I'm pointing out that this proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. We must also consider the impacts on Tribal Treaty rights at the point where the coal is mined, as it is transported, and the impact of coal shipping facilities on fisheries and shellfish on the Washington coast. I urge you to consider these impacts in the scope of the Environmental Impact Statement. The real question is whether our civilization has a future, and whether younger generations will have a decent world to inhabit. Studies like this have the potential to radically change how we, as a society, analyze the real impacts of our choices. Wouldn't it be amazing to take the lead on this transformation You can do it. Thank you,
—Margot Boyer, Vashon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rebekah Danielle Creswell, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Katherine Noble, Hailey, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Carolyn Buhl, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Mike Mercer
—Mike Mercer, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Larry and Irene Rinne, La Pine, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Jeff Durkel, Kalispell, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Frewing, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the continued use of coal-fired power plants as well as the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Koenig, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Harvey Ginsburg, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jack Stansfield, Stanwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ben Earle, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. As a Montana, I'm especially concerned with the impact the trains and the strip-mining will have on my state as well. Coal is obsolete, and the detrimental effects of creating more infrastructure to keep mining it is not justifiable. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dr. Susan M. Elliott, Red Lodge, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ted Treanor, Poulsbo, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cate A C., Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nora Polk, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jacob Scritsmier, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Ruth Holder, Mount Vernon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steve Reeves, Shelton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. The world cannot afford more of 'business as usual' when it comes to old energy technology like coal. The planet is fast approaching a critical tipping point, and putting more coal into circulation will only get us to that point of no return faster. Enough of giving into corporate interests!!! Nearly every corporation out there puts profits ahead of everything else, including the saving of their own planet! Please do the right thing. Do not allow this terminal to go ahead. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jeff Childs, Parksville, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sylvia Black, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Brian Henning, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lynne Lansdon, Mapleton, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Garcia, Scotts Mills, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marcia Rutan, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mr. Linda Massey, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James Mulcare, Clarkston, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Marian Wineman, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Saskia Delores, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, It is completely unnecessary in today's world to be harvesting dirty energy products. Pick up a book and start reading. Germany satisfied 50% of their entire county's energy needs with Solar energy in May of 2012, and in a climate similar to Britain, this was a world record event. Yuma Arizona is the sunniest place in the world. 80% of the entire planet's energy needs could be powered by Yuma and solar tech alone. Solar is free. Once the set-up fees are paid for, the rest is ALL PROFIT. Isn't that what you want Profit Who says you can't charge the same amount of money for the solar usage It is criminal to ignore Solar, Geothermal, Wind, Tidal and Wave, Biomass, and so many others. Prove you're worth a dam. Fuck you, Colin Culbreth
—Colin Culbreth, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kara ford, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. —Charlie Carol Donnes & Hardy, Billings, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Clare Bean, West Linn, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jared Cruce, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect the health of all downwind people throughout the world by increasing combustion emissions of carbon dioxide, and exacerbating congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, increase ocean acidification, hasten species extinction, and escalate climate change. I respectfully urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—George Please enter your last Keefe, Edmonds, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Alan Capps, Mercer Island, WA

It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Debbi Pratt, seattle wa, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Hedwig Backman, Federal Way, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James Paine, Everett, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Miguel Ramos, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The burning of coal is one of the most significant, if not the most significant, contributors to global warming and acidification of our oceans. This profoundly adversely impacts the entire Pacific Northwest, in causing sea level increases that will inundate coastal communities, in disrupting fisheries, and in increasing the frequency of severe weather events. Until coal is taxed at a level equivalent to its environmental harm, doing anything to facilitate its use domestically or in foreign lands is like dropping time bombs on ourselves. It is foolishness even to consider export until the stuff is priced to reflect its severe negative impact on our State, our region, and our world. You are not assessing environmental impact if you do not assess these kinds of impacts in the scope of the Environmental Impact Statement. Thank you,
—Charles Montange, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Beth Levin, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kerry Movassagh, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bobbi Geiger, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Quite SIMPLY, I DO NOT want to see my Grandson dying of Black Lung Disease, do you care SO LITTLE of your children and their future I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Del E. Domke, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. As a resident of Portland, Oregon, I find it crazy that this would expose my kids, as well me and my wife and my neighbors, to these kinds of risks. Thank you,
—Mark Silver, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bruce Dobson, Langley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Lockett, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Nuess, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Spies, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sandra Storwick, Kirkland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James L. Snell, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathryn Kaemerle, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, By exporting coal through Washington State you are merely moving the problems associated with coal to countries overseas, countries that likely cannot afford to invest in pollution control or in more expensive and cleaner electrical generation technologies. At the same time you are keeping the profits in your own pockets. Don't you see the issues with that business model It's unethical and immoral, even if it may pencil out economically. In addition your proposals would have a negative impact on Washington, increasing congestion and noise with more coal train traffic, polluting the air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills. The increased demand for coal would expand strip-mining in Wyoming and Montana, and escalate climate change. You are so short sighted in your drive for profits that you seem to have forgotten that you exist in a wider world, a world that feels the impact of what you do. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathleen M. Saul, Sammamish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ian Shelley, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I oppose the proposed coal terminal in Longview. I am from Oregon, but had the opportunity to spend a lot of time in Longview this last summer, and I saw what a beautiful area it is. To beautiful to ruin with coal exports. While I was in Longview I spent some time in the Highlands, one of the communities close to the terminal. Folks in that area are already suffering from high levels of asthma, and other health impacts from living in a highly industrialized part of the town. A coal export terminal would only increase the health impacts to that community, not to mention the traffic congestion. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Hannah Sohl, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laura Berg, Milwaukie, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Judith Freese, Talent, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dorothy Starshine, Great Falls, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carole Henry, Seabeck, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Patrick Halley, Atlanta, GA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steve Snyder, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tom Struck, Newberg, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cecilia Alvarez, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jim Laybour Laybourn, Jackson, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Patty gates, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would escalate climate change, along with many other ill effects. I urge you to consider climate and other impacts in the scope of the Environmental Impact Statement. It is an outrage that we are still discussing new coal infrastructure in this day and age, when climate change is already visible. Thank you,
—Tide Tide, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Doug Lichter, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Anne Rangel, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ketty Miller, Portland, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rick Lambert, Independence, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Not only no coal exports, but we must stop using coal ENTIRELY. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dean Silver, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ellen Clark, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diane Timberlake, Lake Forest Park, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Peter Sergienko, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Coos Bay, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nathalie, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Ridgefield, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Please choose the people and the land over money. The jobs aren't worth it. Thank you,
—Janae Dale, Sandpoint, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Carol J Buck, Clackamas, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gary Gilardi, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Lewiston, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Taylor, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Larry Bulling, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Paul Handover, Merlin, Oregon, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect communities across the Northwest by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Benjamin Drury, Bainbridge Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bruce Bennett, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I live in Spokane, WA and I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mark Pond, City, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Lynden, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Toni Gilbert, Jefferson,, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Richard Paul Glass, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chris Valiante, Driggs, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bruce D Chambers, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Francis C. Wood Jr., MD, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Martha Wagner, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—William Van Buskirk, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. It would also make permanent damage by coal mining, such as mountain-top removal in Appalachia, profitable. The burning of coal, even it is in China, pollutes the atmosphere. We should not export coal. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Donald Dimock, Monmouth, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sarah Reaveley, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chuck Smith, Sandpoint, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Phil Johanson, Walla Walla, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Martin de Vrieze, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Annie Brock, Llramie, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —G G, orting, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bill Jones, The Dalles, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sandra Murray, lovell, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael Gottleib, Helena, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michele Henley, Everett, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Julianne Ramaker, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Barton, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Leonard, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect the state I live in by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Where fossil fuels are transported by train (or pipeline for that matter), spills follow. Where these accidents occur, things are never the same again. We need to start leaving coal in the ground. This is the only type of carbon sequestration proven to work. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jeff Randall, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amanda Niles, Bremerton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steven A Acker, Port Angeles, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ryan Harrison, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jim Gayden, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Catherine Matthews, Billings, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. And it is the global climate change impact that most concerns me. As such I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Helding, Lopez Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—janet lind, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Eve Irvine, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andrew Brewer, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect many communities by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elizabeth Eggers, Ashland OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Juli Johnson, Kent, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Please consider the full range of impacts from the transportation and burning of the coal and its effects on the environment. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Stella Day, Bellingham, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gene Riddell, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lauren Livengood, Tigard, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda Marie Demaray, Saint Helens, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lorette Schneider, Shoreline, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sara Hubbe, Eugene, OR

This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Oberdorfer, Portlabd, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Edie Loyer nelson, Shoreline, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marilyn Harlin, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Michael Lockhart, Laramie, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sara Preisig, Cheney, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Leslie Cohen, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jamie McHugh, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kevin B Willson, Port Angeles, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Almost everyone in my state, Oregon, is down wind from the proposed terminal in Longview. We don't need a spill to ruin the livability in my city, just the everyday wind pollution would be enough. Not to mention the contribution to global warming, just ask the people in the Philippines. Thank you,
—Eleanor Myers, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ronda Snider, Gig Harbor, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathleen O'Hara, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Richard Niendorf, Friday Harbor, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Also to consider: there are currently precedents being set of lawsuits being brought against the trains carrying the coal because the coal is being released from the trains into nearby waterways - thus violating the Clean Water Act. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lisa Barnes, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Larry Larsen, Mill Creek, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kevin Gallagher, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary McFadzen, Bozeman, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Eliza Hitchcock, Vashon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James Kilpatrick, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Charlotte Sutherland, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nancy Comstock, PORTLAND, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, My recognition that our environment is precious and finite requires me to strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect communities all along the train route(s) by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts and utilize a broad scope when crafting the Environmental Impact Statement. Thank you,
—nate marino, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dave Barrett, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Marett, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to strongly consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Emily Willoughby, Tukwila, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Roger Wechsler, Bow, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diana Anderson, Roseburg, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would require the transport of coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—KGH Nicholes, Martinsdale, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Anacortes, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Coal is an extremely dirty fuel. Invest in renewable energy sources such as solar, wind and waves. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nora Jewett, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Noelle Royer, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Orbell, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Julie A. Anderson, Snohomish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Harrington, eugene,OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Eleanor Dowson, Mill Creek, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kate Miller, Lake Oswego, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan H. Anderson, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jerry Kessinger, Bothell, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nancy Lewis, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a Washington resident, as an American citizen, and as a mother and a grandmother, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal takes America in the wrong directions; we must seek out less destructive, less polluting forms of energy, not continue to harm the earth and our environment through selfish, short sighted stubbornness. This ill-conceived project would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ann Lovejoy, Bainbridge Island, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Kuhn, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laura Reisdorph, Centralia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Olga Troxel, Cody, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Cheri Riznyk, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Edna Elze, thornton, wa., WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. We should be phasing out coal and investing in clean technologies, not investing in destructive, dying technologies. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tina McKim, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Serena Becker, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. —Rick Whitman, Billings, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Debby Allen, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. It would negatively impact human communities who already bear the brundt of harm inflicted by industrial civilization. Wetlands that are remaining would also bear impacts that their already-harmed ecosystems are not in shape to bear. The wetlands are similar in capacity to the human body's immune system. Travel and the potential for spill put these areas too much at risk. People who are in tune with the FACT that we need the EARTH in order to live have been saying for years that we need to follow a way of life similar to that which the Iroquois nation and probably many other indigenous peoples practiced: living for the generation that will be born seven generations from now. The risks are too great for any person seven generations from now to be guaranteed healthy water systems, eco-systems, food gathering, air quality etc. in life-giving. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Courtney Butcher, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amanda Clark, Sisters, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joan Ojerio, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Ralph Browning, Medford, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David James Duncan, Lolo, Montana, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. As a country, we should be putting all our efforts, time and money into increasing the speed with which we adopt non-carbon sources of energy. We should not be exporting a product as damaging to human health and the health of the environment as coal is. I live in Wyoming and I deplore and therefore oppose the use of strip mining in my state. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol WAuters, Wilson, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sandy Wood, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. It is dirty getting it out of the ground, dirty transporting it, and dirty burning it, in addition to the fuel needed to transport it on land and sea. Short term gains for long term pain. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—E Verbeck, Rogue River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Joan Miller, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Doris Davis, djdavis@peopplep-c.com, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Anthony Albert, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA. The trains that would carry the coal to Longview would pollute the communities they pass through. Since the railroad tracks cut right through the middle of communities like mine, (rather than bypassing them) they would also cause traffic congestion and could cause significant delays in the response by emergency personnel such as fire and medical responders. The potential for pollution of our air, waterways, and even the soil where coal dust would settle as open cars carry the coal to the terminal is frightening. As we've seen in the past, large corporations tend to ignore potential problems until they are major issues and by then the damage is done. Finally, beyond the local pollution, local problems, and environmental impact of the mining itself, there is the issue of global warming which would be worsened when this coal is consumed somewhere overseas. All in all this terminal would be a disaster, and unfortunately the people that will pay the price is the local communities poisoned as the trains pass through, and everyone else as the dirty coal is burned. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda M. Reilly, Saint Helens, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Catherine Bailey, Wheatland, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Bosche, Everson, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matt Ison, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lisa Freedman Freedman Shaffer, San Jose, CA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lloyd Johnston, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Barbara J Wenzl, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robin Karr Morse, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a born-and-raised Washingtonian, I oppose the construction of a coal export terminal at Longview, because I understand the importance of unpolluted coasts and rivers not just to my state's long cultural heritage, but also to our economy and health, both of which depend on the health of those waters. As a citizen of this planet, I oppose any expenditure that supports our world's unhealthy dependence on non-renewable resources, the burning of which will only worsen global climate change and the health of humans and native wildlife, while only further lining the pockets of the super-rich and environmentally irresponsible. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you.
—Katharine Klise, North Bend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lisa Crosby, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—william Young, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amy Masreliez, Seahurst, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joyce hoikka, Woodinville,wa, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. We need to get serious about alternative energy. If we wait until all the available coal and oil are gone, it will be too late-both for s and for the poor tortured earth! Thank you,
—Sheryl Nims, Kamiah, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Brett Warnock, Portland, OR

To U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Again and again We-the People have opposed this and other grabs by greedy extractive industry. Feathering their nests at the expense of our planet--not to mention our health--is unconscionable. Until we stop extracting and disseminating fossil fuels, we will not 'need' clean fuels. We must make Big Oil, Big Coal and Big Fracking use the clean technologies that are already available to them. It's way past time to stop aiding and abetting dirty energy. You can help change the direction by refusing to allow dirty coal to be transported thru and shipped from WA. Mining will cease only when money is no longer to be made I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet Ievins, Medford, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—kate eller, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—ronald long, Woodinville, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kevin DiRito, Graham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Virginia Hanson, Kalispell, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael Forster, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Bainbridge Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joan Alison Daniels, stevensville, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tim Buckley, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement instead of focusing on the final goal with laser-like intensity. The things which you usually ignore as unimportant affect the health of citizens, the ability of citizens to earn a living from the ocean and feed others, the health of our environment and the oceans. At this time in our history, coal should stay in the ground, in spite of the loss of investment value. Thank you,
—Jeffrey Panciera, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Spanaway, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Robert Fishburn, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Studies have shown it will also have a minimal impact on adding jobs to the region, resulting in little benefit to the economy with large potential environmental and health issues and costs. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joseph Montange, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Bakke, Lacey, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Esther B. Wolf, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. The US is moving on from fossil fuels, so the coal companies have coal to sell while they can. SDD Thank you,
—Mr. Shelley D. Dahlgren PhD, Issaquah, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. I moved here recently from the East Coast and hope to make the Pacific Northwest my home. However, this proposal would pollute this area's beautiful air and water, damage important aquatic ecosystems, threaten our health and risk catastrophic accidents and spills. Worse, it would further contribute to greenhouse gas emissions and illustrate that Washington is not committed to protecting its residents from the very likely negative impacts of climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Daniel Rejto, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Alison Helton, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Littlebird Parks, Bigfork, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nellie Basher, Renton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Summers, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marcus Lanskey, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sam Guyer, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a concerned citizen and a natural resources professional at a university in the western U.S., I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lynn Wells, Moscow, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Norman, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Potter, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nina French, Seattle, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Susan Wechsler, Corvallis, OR

Railroad tracks pass near my school and next to some new businesses in Vancouver along the Columbia River. The dust from the coal trains would impact health (my principal has very bad chronic asthma). The dust would also dirty the tables and chairs where new restaurants alongside the Columbia River now have outdoor seating. Vancouver has paid a lot of money to grow the economy along the river. I believe these coal trains will negatively impact businesses as well as health.
—Kay Ellison, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rachel Joerling, The Dalles, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Richard Weaver, Bozeman, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Creswell, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. To say nothing of systemic global climate disruption, ocean acidification, and mercury & other toxic pollution drifting back to the American Pacific Northwest after burning in Asia. We currently have all the scientific and technical knowledge, and the physical resources, to get all of our energy from renewables according to Mark Z. Jacobson, Professor of Civil and Environmental Engineering at Stanford University. Feed-in-tariffs--which have helped put Germany and Ontario, Canada, at the forefront of the transition to green energy--are an important policy tool to incentivize this transition. Renewable energy already employs 2.7 million workers (more than the fossil fuel industry), and studies have shown that green energy will continue to create far more jobs than the fossil fuel industries. A U.S.-led green industrial revolution will move our economy forward, create millions of new jobs, and help ensure a livable planet for future generations. Global climate change is here. Future generations are watching to see what actions we take to reverse it. Thank you,
—Jeff Stookey, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joel Kay, Milwaukie, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Tim McGuire, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—roger stockeer, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Not only do I do so for the reasons below, but because coal contains pollutants like mercury, which go into the air after the coal is burned and are brought right back to our shores by the wind. Mercury is dangerous, and mercury is forever, and it's just one example of what will happen if this port is built. Use the money to support renewable resources! This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dorothy Patent, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Smith, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pat Rasmussen, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, PLEASE READ: WASHINGTON STATE IS STILL, AFTER 50 YEARS, CLEANING UP AFTER WOOPS (NUCLEAR REACTORS IN SOUTHEASTERN WA.) THAT DISASTER IS STILL LEACHING IT'S RADIOACTIVITY INTO THE LOCAL GROUND WATERS AND THEY IN TURN INTO THE ONCE CLEAN COLUMBIA RIVER. SEATTLE IS STILL GRAPPLING WITH THE UGLY DUWAMISH RIVER CLEAN UP....HOW TO CLEAN UP LEACHED TAR WASHINGTON IS NOT NOT NOT A WASTE DISPOSAL AREA FOR CANADA'S TAR SANDS, FOR THE SOUTHERN STATES' FILTHY COAL, OR FOR EVERYONE'S PCBs. LEAVE OUR BEAUTIFUL STATE.....ALONE! COME TO VISIT NOT TO DEPOSIT YOUR WASTES AND LEFTOVERS. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diane Butler, Nanaimo, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Luanne Anderson, Chinook, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Langley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol Hausser Bibler, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Margo Thorpe, Lynden, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ms. kathy Seabrook, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. The proposal would also enable other countries to continue to burn a dirty fuel rather than invest in cleaner technologies. This could not only accelerate climate change, but also create short-term air quality issues that may spread much further than just the borders of those countries. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Micahel Taylor, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—delia gerhard, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Steven Berkson, Keizer, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Hugh Harkins, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, White Salmon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Delores Schutt, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Coal is already well known as a filthy, polluting source of energy. The constant fighting with the coal industry to install pollution controls, cover their loads, etc. is an endless struggle, costing money and health! Get rid of it permanently! We have sources of clean energy which are more efficient, less polluting, healthier, etc. etc. etc. STOP COAL!! I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Polly Tarpley, Poulsbo, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan Lourie, Bozeman, MT

—Dianna MacLeod, Langley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, It is critical that we move away from coal as a fuel source. Even if we are exporting it to other countries, it still ends up in the air above our planet! This is an important time to take a stand and keep the coal in the ground where it belongs. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you for your consideration. Best Regards, Nancy Holcomb
—Nancy Holcomb, Hailey, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Peter Carr, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Danny Dwinell, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Hon Soulo, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, The use of dirty coal must be stopped and the focus placed on environmentally clean energy sources. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jodi Lorimer, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—D Goldsmith, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Virginia Long, Bellevue, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—William and Virginia Starling, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Schutt, Langley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Ashland, OR

Hi, you must participate in this decision as we all must. What 350.org says is true. Let me add that the more we concentrate our efforts NOT on the energy of the past, but on Solar Panels, the energy of the future, the SOONER all these coal problems will be solved. If people want electricity, let them get Solar, the more we aid this decision, the sooner and cheaper all these problems will be solved. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jack Scott, Sequim, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elaine Killian, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Thom Thompson, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ms. Suneeta Eisenberg, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andrew J Wold, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lawrence Treadwell, Sheridan, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Lilliwaup, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jacloe ONeil, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Anne R. Fitzgerald, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I vehemently object to building a coal export terminal at Longview, WA, that would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect communities by increasing congestion and noise with more coal train traffic, polluting air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. The science tells us that burning fossil fuels is a primary cause of global warming; it also tells us that the only way to avoid exceeding 2 degrees Celsius global temperature increase is to leave most of the fossil fuels in the ground. Wouldn't it be prudent to listen I urge you to consider these impacts in the scope of the Environmental Impact Statement, and then to cancel the project for good. Thank you,
—Phil Hanson, Portland, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dublin Popov, Salem, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kevin Prince, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Charlie Montgomery, yamhill, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Quahlee Lassila, Chehalis, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—J R. Jarvis, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elizabeth Archer, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —John B. Neighbor, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kenneth Fisher, Pinehurst, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Howard Silverman, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Brian Allen, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sherrie L: Heckendorn, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nancy Gale, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lorena Havens, Acme, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I live in the Columbia River Gorge, and I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. A recent study published in the Proceedings of the National Academies of Science has found that people of northern China have 5 years less life expectancy than their counterparts in the south, because of intensive use of coal. The proposed Longview terminal would contribute to the negative health effects of coal pollution, not only regionally in the Northwest, but to the Chinese who would be end users of this coal. Globally the effects of coal pollution on climate change are well-known. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Christensen, Corbett, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Mataja, Maple Valley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cynthia Rhein, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Byron MD, Hardin, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Dorian Zimmerman
—, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Stephanie Pure, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Peter Konis, Bainbridge Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan Hayduke, Livingston, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Riley Blackhurst, MISSOULA, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Potts, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Get with the times!!! I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Max Schultz, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Richard Nutt, Snohomish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Madelaine Moir, sequim, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a resident of Washington State, I strongly oppose the construction of a coal export terminal at Longview, WA because it would increase the transport of coal on trains and ships throughout the Northwest. Although my home is further north, in King County, these export terminals threaten to transform the entire region into a "rust belt" waiting to happen. Railroad crossing injuries and upkeep of local lines, accidental spills, exposure to noise and dust pollution for nearby communities are all threats to the health and quality of life in our area. This proposal would very likely negatively affect the salmon runs and fishing areas in the Northwest, impact local industry related to tourism and fishing, and escalate climate change. We still have current treaties with local Tribes and are obligated to honor their resources, fishing, and hunting lands. Can we really afford to mitigate the impacts on local Tribes and still benefit economically from these coal ports I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Theresa Nuccio, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect our communities by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gary Millhollen, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Coal is dirty, dusty, smelly, a threat to public health and contributes unacceptably to global climate change. Keep it in the ground! This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James Jacobson, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Louann Chapman, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lewis L Mc Farland, Goldendale, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect the community by increasing congestion and noise with more coal train traffic, polluting the air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Patricia Warden, Newcastle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pamela Lucas, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda Petersen, University Place, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Frank Dimayuga, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Elaine Scott
—, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Vivian M. Bartlett, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Escalating climate change is definitive for me -- we cannot do this. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan Goldrich, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cheryl C., Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—carole melkonian, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Howard Pellett, Anacortes, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. —Elizabeth J Hauser, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Coal is the dirtiest form of energy and it's long past time that it is phased out. We do not want coal trains in our neighborhoods spewing toxic coal dust into the air and our water. We do not want coal trains delaying traffic and emergency vehicles. We do not want coal being shipped through the PNW to China where they are already using too much coal as they exacerbate global warming. No more coal - keep it in the ground where it belongs. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gayle Janzen, Seattle, WA

—Carly Brook, ,

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—P Anna Johnson, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jean Sullivan, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Paulette Meyer, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Do not allow the permitting for this project because it is not in the best interest for environmental safe and clean air and water standards and will potentially negatively impact human health. Thank you,
—Phoebe Quillian, Talent, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nancy Sosnove, Everett, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Why is it that we exceptional Americans cannot do as other countries have done and divert resources toward renewable energies. Is it because we are to beholden to the moneyed interests involved I would much rather be writing to you about something I SUPPORT rather than continually fighting against those things I oppose, but my leaders continue to stay in the past rather than reach for the future when it comes to our energy needs. It can be done. It has been done elsewhere. I am not willing to compromise my environment further in support of dirty energy. Time for Washington to take the lead here. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sheri Staley, Shelton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Wonono Rubio, Port Townsend, Washington, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ted Light, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet Weidman, Astoria, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kitsie Parkinson, Oregon City, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Nrthwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kai Russell, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Timothy Ulrey, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marilyn Lamb, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Donna Weissbeck, Monroe, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Dana Furgerson, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, There is no such thing as clean coal! So don't be shipping loads of coal off to other countries to burn, because it just ends up in the atmosphere of our planet. You want jobs Create a new clean energy source. Rebuild the crumbling infrastructure of the US. Elect representatives who have a vision for the future. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol Edwards, Polebridge, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rebecca, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Susan Kay, Vashon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Langlois, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, as well as expand strip-mining in Wyoming and Montana. Beyond the "local" impacts, it is high time that the U.S. as a whole does more to combat climate change - including avoiding exporting our CO2 emissions abroad - which is exactly what this would mean! We can't claim that we're making progress on our CO2 goals when we export coal to factories in China or other countries that are making products that are consumed in the United States. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Matthew Dearborn
—Matt Dearborn, Packwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Blasche, Hillsboro, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Smith, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. This is a test. If our government cannot stop something so clearly unhealthy and destructive as coal exports from the Northwest before they start, then we are doomed. We should all emigrate to sane countries. Thank you,
—John Nicol, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Glencairn Morgan-Murray, Graham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Deanna Wells, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Young, Cle Elum, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tom Denison, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—G DiLabio, Mount Vernon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amy Heyneman, Bainbridge Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gregg Bryant, VANCOUVER, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Maya Jacobs, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, The construction of a coal export terminal at Longview, WA, which would transport coal on trains and ships throughout the Northwest, would negatively affect the region by increasing congestion and noise with more coal train traffic, polluting the air and local waterways, causing economic harm to existing businesses (fishing, tourism, etc), delaying emergency responders, damaging (perhaps irrevocably) aquatic ecosystems and fishing areas on the Columbia River, harm human health, increasing tanker traffic with the potential for shipping accidents and spills, expanding strip-mining in Wyoming and Montana, and escalating climate change. It is imperative that you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Helen Glidden, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. This is an old way of heating/cooking etc. Let's go full out for a better way for all of us on the planet! Thank you,
—Rose Best, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Anita Largent, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andria Herron, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. There is really no such thing as clean coal! We need to spend on clean fuel technologies, not shore up dirty ones. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Leslie C, Gold Hill, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Robert Brown, Fircrest, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jonathan Moo, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tim Michael Kearney, Issaquah, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Randall Webb, Portland, OR

I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diann Sheldon, Steilacoom, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Paul Seer, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Deborah S. Martin, Anacortes, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Turner, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Melissa Young, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Foss, Granite Falls, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lani Nestlen, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Burning coal in Asia will negate almost all of the U.S. progress on clean air and carbon reduction. And we will be breathing the polluted air coming across the pacific. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chuck Gustafson, Bow, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathy McFall-Butler, Federal Way, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal is the exact opposite of what we need to be doing for the world's energy future. The science is clear - burning more coal and putting more co2 in the atmosphere will make global warming worse. Even considering such a plan demonstrates an alarming lack of leadership. This is the big issue, the issue that will directly impact the health of my children and grandchildren and the political stability of our world. But there are other important issues as well. Transporting that much coal in open train cars will negatively impact every community through which the trains run. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Charles Forster, yakima, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Johanna New Moon, MILL BAY, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Vernon Popowski, McMinnville, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Meredith Shores, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA because of the significant increase in carbon in the atmosphere, and associated increase in global warming and climate change impacts that the project would result in when this coal is burned overseas. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Megan Kemple, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Greg Allen, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I LIVE IN PASCO WA WHERE 28 TRAINS EVERY DAY ARE PROJECTED TO PASS THROUGH OUR VALLEY LEAVING TONS OF COAL AND DIESEL GAS AND PARTICULATE EVERY DAY FOR 10 TO 15 YEARS. I FEAR FOR THE HEALTH OF 16,500 STUDENTS ON OUR SCHOOL PLAYGROUNDS AND CAMPUSES. FREQUENT WEATHER INVERSIONS WILL HOLD DOWN AND INTENSIFY THE DANGER TO THESE CHILDREN AND THEIR FAMILIES. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Shirley P. Lucas, Richland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rebecca Picton, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—jacquie martin, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ralph Harris, Olympia, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Graham Hubenthal, Stanwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Paul Torrence, Williams, OR

To the U.S. Army Corps of Engineers, the WA Department of Ecology, and the Cowlitz County Commission, I totally oppose the construction of a coal export terminal at Longview, WA that would transport coal on trains and ships throughout the Northwest. This is my back yard. The coal dust will get on and into everything. What doesn't spill off the trains will soon be burned and in the atmosphere. It's poison for us and for any hope of a future. You need to stop this. This project is a problem, not a solution. The only reason it is being touted as a solution is greed. It's obvious as the nose on your face, which will soon have trouble breathing because of the effects of coal and global-climate change. So please get real and do something for the citizens of this country instead of the tax-dodging corporations that wrap themselves in the Flag and call greed an American value.
—Erik Jacobson, Moscow, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dianne Salyer, Sequim, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Coal is an outmoded source of energy. The population of our planet has grown in size to a point that makes coal burning extremely unhealthy to use as an energy source. China is experiencing the effects of coal burning. Their people are dying, and suffering serious health problems due to the use of coal for heat and cooking. As an "advanced" society, we should not be adding to this pre-existing problem, but rather, we should be trying to move away from coal and put effort and resources into wind, solar, and other alternatives. This is the morally correct position that we as an "advanced" nation should fight for and promote. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joan Michlin, Bozeman, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chandra Paetsch, Cottage Grove, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—barbara Fankhauser, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ardith Arrington, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. As a U.S. citizen, I strongly object to leasing BLM lands for coal extraction that destroys the land and pollutes ground and surface water. The Tongue River Valley and its ranches, and its special habitats will be disrupted by a new rail line. Many First Nations lands and resources will be negatively impacted by the coal extraction, transport, and combustion. Our National Security is threatened by Global Climate Change that will increase conflict over resources and drown coastlines. Our coastal military installations are already being impacted. Our marine waters are acidifying and dissolving shellfish larvae. Endangered salmon populations will be negatively impacted. I am especially concerned about the terrible impacts of a major fuel spill. Sooner or later, a major fuel spill will occur as vessel traffic increases. There is no way to "clean up" a major fuel spill that will impact our region for decades. The minor number of additional jobs pales in comparison to jobs lost and quality of life and health impacts. All of this to ship coal to Asia so that the pollution can be carried back to us on the prevailing winds. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider each of these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet Alderton, Deer Harbor, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Stacy Bloodworth, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda Gruer, Shelton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kris Strane, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carrie Cole, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marie Martin, Medicine Bow, Wy, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Frank Carlton, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bev Schubert, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, The Earth now has more than 400ppm of carbon dioxide in the atmosphere. This will produce unprecedented warming and climate change on Earth. We must sequester carbon. The best way is to KEEP COAL UNDERGROUND. Thank you,
—David & Elizabeth Waldorf, Adair Village, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect many communities, increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—KD Wescott, Kent, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Merna Eden, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Brian Hutchinson, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Wilcox, kennewick, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—lily heller, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, With no doubt or hesitation, I oppose construction of a coal export terminal at Longview, WA. It would enable coal transportation throughout the Northwest. The results would include serious congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the likelihood of shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I ask you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Duncan Baruch, Portland, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Edward Mills, Bellevue, WA
Science has proven that mercury in coal is neurodegenerative. That means is breaks down neural connections reducing I.Q. and interrupting normal brain functioning. When coal is brined the mercury goes into the rain clouds. Those rain clouds from Asia and India are going to distribute mercury and many other pollutants that will retard our nations population. Selling that coal to be burned over seas is treason in my opinion.
—Jeremy Emmons, Astoria, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael Logozzo, Mountlake Terrace, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, AS a parent, family doctor, and air breather, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Christopher Bowlds, Seattle, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gary Derry, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Uli Johnson, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I'm writing to add my voice to the many others who strongly oppose the construction of a coal export terminal at Longview, Washington, which would transport coal on trains and ships throughout the Northwest. Not only does it make no sense to spend so much money to develop an infrastructure and support system for an outmoded form of non-renewable energy, but this proposal would harm communities, threaten public health, and irreparably damage this planet on which we depend, from air and water pollution to destroying habitat to adding to our climate change crisis. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marsha Rakestraw, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Patrick Munyon, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Judith Juby H Fouts, Anacortes, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. After all, the use of coal is SO "last millennium"! This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Worse yet, these damages are not balanced by *any* increase in my personal own wealth or that of my neighbors, so why *should* my family support this terminal I urge you to consider these impacts in the scope of the Environmental Impact Statement. The energy future of this nation, as well as others around the globe, is in sustainably renewable resources -- such as wind power and solar energy -- that help our species coexist AND co-habitate with other species (whether animal, vegetable, fungal or protist). Our choice really is clear: move beyond fossil fuels (either of plant or animal fossils) OR get ready to become fossils ourselves. Our children deserve better choices be made by us all. Thank you,
—Leuth Novotny, Portland, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect communities I travel to by increasing congestion and noise with more coal train traffic, polluting air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. The sky will not fall if coal stays in the ground. The sky will get healthier. We all will be healthier for not sending coal overseas. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lorraine Marie, Colville, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. We are smart enough to figure out a much better solution. And I'm pretty sure that everyone knows that. Let's not allow the interests of a few determine the outcomes for many. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lis, Spokane, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laurie Schwisow, Shelton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer LENHART, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Daniel W McLay, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. It is important to stop the continuous pouring of carbon dioxide into the atmosphere. Coal is a big polluter. We should not help other countries with even fewer environmental laws to pour even more pollution into the skies. That is what we will be doing if we approve of the building of this big coal terminal in Longview, WA. Even the Canadians don't want those coal trains in their pristine territory. We don't want them either. Say no to this project. It is going backward! To do this is to condemn future generations to much worse environmental damage. Thank you,
—Mary Gallagher, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Beth Sellars, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Lehnherr, Billings, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I am an Oregonian -- fifth generation -- and I and my family live close to the proposed Longview terminal. I care deeply about this issue. It is time to take a stand and say "no" to coal, and no to this project. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Wendy Petersen Boring, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—kendra bench, Mt. Vernon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. I live in North Portland. Our air quality is already among the worst in the country. Adding particulate matter from coal trains would significantly worsen an already bad situation, endangering the public health. Not to mention the noise of endless trains, traffic congestion from mile-and-a-half long trains crossing roads, the pollution of the Columbia River, and damage to the pristine beauty of the Gorge. In addition, the global climate implications of releasing this much carbon into the atmosphere are truly horrifying. Unfortunately, while these corporations will make millions off this deal, all the costs are simply written off as "externalities," beyond the scope of federal concern or corporate responsibility. The only argument offered in favor or this deal is "jobs." As a victim of the economy myself, I am sympathetic to those who want the jobs, but a few hundred jobs (most of them short-term) cannot offset the catastrophic costs that the rest of us will have to bear. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rita Moore PH.D., Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rosie Sharpe, Port Angeles, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elise Wright, Bainbridge Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Prudie Gildroy, Helena, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Zachary Nelms, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jim McCue, Idaho Falls, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—PAUL HANSEN, Sequim, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my state and the world by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Debra Morrison, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Douiglas Lomas, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—B Bailey, Eastsound, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Drew Herzig, Astoria, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet Kranz, Mercer Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—e Davidson, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA! No no no no no! This is the opposite direction that our policies and big decisions ought to be taking our society as a whole. We are global citizens with responsibilities to each other and the generations to come that will be cleaning up or just living in our mess. Thank you, Jon Taguchi
—Jon Taguchi, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Rose Mills, Bonney Lake, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sam Bliss, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mr. Joe Neumann, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Peter Paget, Ellensburg, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elyette Weinstein, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jill MacIntyre Witt, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mr. John Swanson, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Coal should be left in the ground until it is economically feasible to use it without releasing carbon dioxide and other pollutants into the airshed. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bob Swanson, Lake Oswego, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bruce Shilling, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Adam Gaya, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jg Gray, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Catherine Billie, St. ignatius, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect the local community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Becky Beaman, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Muller, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Lou Francis, Renton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bob Lapsley, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Donna Snow, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lorna Pearman, Dexter, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. -->Coal is a killer and there is no good reason to continue developing it as an energy source when other technologies are much cleaner. -->Coal is the biggest U.S. source of emitted CO2, which is responsible for global warming. The past decade is the warmest in recorded history and scientists are unanimous that human industrial activity is causing this warming. You cannot choose to "believe" otherwise, just as you cannot choose to "believe" that gravity won't make a shovel fall out of your hand if you drop it. We have already passed 400 ppm CO2 in our atmosphere when 350 ppm is the level beyond which climate change is inevitable. We don't let watchmakers put toxic radium in wristwatches anymore--why should we keep putting toxic coal into the air we breathe -->Coal burning also adds sulfur dioxide (SO2), ash, soot, and toxins to our air and waterways. SO2 contributes to acid rain and ocean acidification, which is killing our marine life, as recently reported in the Seattle Times. The Pacific Northwest depends heavily on its fisheries and these are already being poisoned by lower pH resulting from fossil fuel burning. -->Coal mining and coal burning add toxic ash, mercury, arsenic, chromium and cadmium to our air and water; these and other toxic coal pollutants are associated with cancer and respiratory disease. -->Coal mining destroys forests, lakes, rivers, even entire mountaintops, and dumps wastes into our watersheds. Particulate coal dust from storage piles and train cars contaminates our air and causes lung disease. Diesel exhaust from locomotives pulling coal trains also pollutes our air, water and land and contributes to lung disease. -->China has already surpassed the U.S. in CO2 contamination by coal burning, and China lacks a free democracy by which concerned citizens can challenge these practices. We cannot in good conscience ship more coal to China just to have it pollute the air and water and contribute to global warming. -->You cannot put a price tag on health and clean air and water. To say that coal creates jobs is short-sighted because it kills fisheries and fisheries jobs, and also induces respiratory diseases and cancer. -->It makes no sense to kill off sustainable fisheries jobs in the name of creating unsustainable coal jobs, while making thousands of people sick with serious illnesses at a time when trying to lower health care costs is a pressing concern. The proposal for a coal export terminal in Longview, WA would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Stephen Rosenman, Mercer Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Suzanne Zook, Cave Junction, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Imogen Taylor, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—MS Barbara Barbara A. Cline AIA, Yakima, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dr. Matthew Hicks, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda Fay Sampson, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Prophet Abramson, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ian Woodford, Wenatchee, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Charles Kraft, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andrew Stone, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Juvata Rusch, Eugene, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dave Rebal, La Center, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cheyne Cumming, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Paul Franzmann, Walla Walla, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael Gamble, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, and potential new heroes of my pantheon: As you may already know.... I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Shanno Svensson, Snohomish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I insist that you consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mrs Gloria VanElverdinghe, Dallas, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Donal Wick, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Mesford, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Kirkland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a resident of north central Oregon, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The bottom line is we now know the burning of these fossil fuels in Asia will overwhelmingly contribute to climate disruption here in Oregon and Washington. The danger is imminent. In 14 years we will cross the point of no return when we pass the 2 degree celsius mark. This will degrade both our local and regional biosphere. Let's export and import hybrid car batteries, solar power components, and windmill parts. Those are sustainable jobs we all need and agree on, not dirty coal.
—Matthew c Smith, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Zechariah Heck, Grants Pass, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Additionally, I urge you to consider the external costs of outdated coal power plants both on Climate and enviroment, due huge CO 2 emissions. We now know that even if it is sent to China, it will come back via wind, to haunt us. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sandip Dasverma, Richland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Twin Falls, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, No - absolutely NO to the construction of a coal export terminal in Longview, WA. What an awful idea! Not only is burning coal bad for the planet but the local environment would be harmed in even a shorter time period - our communities. I live in the NW too - coal traffic would pollute our air and waters, harm local businesses and be a danger to legitimate businesses, people and other species that thrive on healthy environments in our beautiful NW. Let's do all we can to keep areas on the Columbia River free from more harm (we have already done). Not to mention the expanded strip-mining in Wyoming and Montana that harms their communities and escalate climate change. There are better ways to create energy - Let do it instead of this dead-end and destructive modality. It's time to say NO MORE! I urge you to consider the harmful impacts (the big picture as well as the local harm) in the scope of the Environmental Impact Statement. Thank you,
—Paula Thurston, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, There is enough scientific information available to give you a pretty clear picture of what coal is doing to our environment. I might favor a coal export terminal IF IT WERE SUPPORTED BY FACT AND REASON. Coal is a very polluting resource! How does USA coal compare to China's other coal import options from a pollution perspective Will a coal export terminal here lengthen the time frame for China's coal fired power plants to remain in production What kind of contract can be created to limit the time China runs its coal fired power sources while developing cleaner electricity Will China pledge to stop building coal fired power plants Will China keep all pledges it makes (How can they be enforced) I do not want to deny China this coal and loose the jobs it would create if it means they will in turn burn a lower grade coal and pollute even more. The days of Carte Blanche pollution are over! I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lionel Hastings, Renton, WA, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. I've watched year after year as one stupid greed based decision ater another was approved. It's not just our state your destroying you are on the way to destroying all our futures!!! This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jan Ellis, Gig Harbor, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kangqiao Liao, Walla Walla, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert J. Lockhorn, Vancouver, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. —gary wright, Cottage Grove, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chandra Holsten, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mark Johnson, Lake Forest Park, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lindsay Hamilton, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Rebecca Weston, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This planet is already changing fast. We are in for a horrible time in the very near future. There will be massive suffering, privation and death! Meanwhile, Repugnicans like the Koch brothers are actually paying people to lie and confuse people... all to make and protect PROFITS! They could care less about the "little people" or our beautiful planet. It's all about MONEY. Coal is a major player in this terrible scenario. I'm sorry about the economic impact of doing without coal, but it is NECESSARY! (among many other sacrifices and fixes). SO, I VOTE NO! NO COAL, NO E PORT TERMINAL, PERIOD! Thank you,
—Cindy Black, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael S. Martin, Mountain Home, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect many communities by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Revenues from coal mining, shipping, export benefit corporate shareholders who don't live in the northwest at the expense of ecosystems on whose health our lives depend, at the expense of people who do live here. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Deanna Pumplin, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amy Boatright, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet Lyon, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Baum, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nicholas Smit, Shoreline, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. We need to move away from energy sources such as a coal. Our environment and our future depend on it. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nick Brakel, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nadine LaVonne, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. If we truly envision, desire, and are in active pursuit to strive for a cleaner, healthy, and more beautiful world, we must stop implementing old ideas and habits that we know to be flaw and start taking a stand for knowledge and beneficial change. If we do not take the step today, then when Let us take an active stance now and guide in a future that is for the people, and the planet I urge you to please consider these impacts in the scope of the Environmental Impact Statement, and to take in account the footprint we are leaving for future generations should Big Coal win out. I urge you, say no to coal. Thank you,
—Ashley Kaluza, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet R. Allison, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ronald Hawk, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lynne Taylor, Gaston, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elaine Green, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Danika Bevirt, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathy Krisinski, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Michael Mosin, Edmonds, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ursula Klee, White salmon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. These are legitimate concerns which affect all human, plant and animal systems, air and water safety and our city organization. We deserve to be protected against these plans to both produce more coal, transport it and thus be responsible for its use in the world. We can no longer pretend we won't be affected by all these stages in the process. Thank you,
—Saralee Kane, Mercer Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect our communities by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dorothy Jordan, Lynden, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Yellowstone River, Clark Fork River, Lake Pend Oreille, Spokane River, Columbia River. While also harming human health, increasing tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lowell Chandler, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—david iles, langley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Deborah Richards, Cheyenne, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sheila hearer, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Mesko, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol Jean Kraber, Kirkland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tobiah Israel, Goldendale, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—AW Emch, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jim Van Dinter, Boise, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chris Callahan, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lisa Bay, Helena, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Vv Bock, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan carter, Gig Harbor, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chris & Annie Troutner, Anacortes, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Coal dust on apples, pears wine grapes for starters are why I do strongly oppose the construction of a coal export terminal at Longview, WA. I hope you will really consider what the train traffic clogging intersections will mean for the local economies. And yes I'm posting this all over every social media relentlessly, because it's that so terribly wrong. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Brokken, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jean Dilley, White Salmon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Charm Miller-Davis, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—connie patnode, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer mccolpin, ,

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pam B. Wood, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jean Mullen, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chris Mossel, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a resident of Washington State, I strongly oppose the construction of a coal export terminal in Longview which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Accelerating arctic warming and other early climate impacts have led scientists to conclude that we are already above the safe zone at our current 390 parts per million of CO2 in our atmosphere, and that unless we are able to rapidly return to below 350 parts per million this century, we risk reaching tipping points and irreversible impacts such as the melting of the Greenland ice sheet and major methane releases from increased permafrost melt. Fossil fuel corporations have 5 times more oil and coal and gas in known reserves than climate scientists think is safe to burn. We have to keep 80% of their fossil fuels underground to keep the earth in livable shape. The construction of a coal export terminal in Longview, WA, would make this horrible situation worse. Our state, and the USA, can do better. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dr. Baba Kofi Weusijana, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, 64 formerly pristine lakes in Montana contaminated because of coal burning plants in Washington. It's an environmental disaster. I am totally against this the use of coal for fuel. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—M Chessin, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nick Crumpton, Austin, T

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Aurora Sancoy, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathleen Rutecki, Drain, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Christopher Parsons, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ellen Garduno, Edmonds, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. (The Columbia Gorge is already overloaded with train traffic, and the waters already suffer from coal dust leakage. I am also familiar with many of the local roads in Cowlitz County and can envision the traffic snarls to come, from increased coal transit. Most importantly, the burning of coal must be phased out! Ignoring onsetting climate change will cause increased damages everywhere to human infrastructure and liveability, and cripple natural systems on which we depend. This is not time for compartmentalization in deciding how to read regulations. The long-term view, the comprehensive assessment, must be applied.) I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ted Kozlowski, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karawynn Long, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and, worst of all, escalate climate change. The benefits are not worth the risks! I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Maureen Kelly, Cove, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laura Craig, Yelm, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. —John Donley, Coos Bay, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—carl Hamela, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dianne Ensign, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. I lived in the PNW for 8 years and stand with my former neighbors and friends regarding this proposal. They believe, and I agree, that if the coal export terminal is built in Longview, it is a furthering of the damage that comes from coal pollution, worldwide, including the escalating effect coal as an energy source has on climate change. The PNW is a model of forward thinking action and plans, and this proposal fails to recognize the need to stop burning fossil fuel. When i lived in Oregon, I paid a little bit more for my electricity, because I had the option to do so. I only wish i had that option here in Pennsylvania. I urge you to continue leading the rest of the country towards choices that depend on renewable resources - like wind and solar, and away from the calamities that climate change will bring, not only for our own nation, but for the world. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—margi roberts, Astoria, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pablo Cabrera , Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Riker, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Natalie Wagenbrenner, Moscow, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—C Bradley, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Wendy Wilhelm, Acme, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Robert Brandt, Edmonds, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Denise Attwood, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James Manzione, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bill Bailey, Beaverton, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Aberdeen, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mela Ropke, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Char Jones, Hamilton, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mr. Graeme McDougal, Dillon, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Analisa Taylor, City, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Vincent Saulino, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Now is your chance to change the Army Corps of Engineers' reputation for designing and building environmental disasters and take a giant stride away from "business as usual" an into the future. Prehistoric trees and dinosaurs deserve the peace, quiet and cleanliness of an undisturbed resting place. And, the people of China need our help as well. They are not "communists." The live under the same burden we all do. A government system strongly, if not totally, influenced by powerful economic interests. Help clean up our environment, their environment and be part of a movement to take our government away from monied interests and return it to the American people. Thank you, John
—, Olga, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Ryan, Stevensville, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. There is no bigger issue on this planet than the health of our global environment, and the time is well nigh for all of us to make changes and sacrifices for the sake of mitigating climate change. For the sake of all life on this planet, please do not build an coal export terminal in Longview, WA! Thank you,
—Jennifer Merrill, Bainbridge Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Martin Stannard, Cody, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matthew Arnold, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Dana Bleckinger, Yachats, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Debbie Bremner, Shoreline, WA

I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect all communities by increasing congestion and noise with more coal train traffic, polluting air and local waterways. It would also damage aquatic ecosystems and fishing areas on the Columbia River. The strip-mining in Wyoming and Montana will be detrimental to their water quality. Ultimately it will worsen climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Buffy Hake, pendleton, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal does the opposite of what I wish for my community it would have multiple bad impacts: Pollute air and local waterways, and tax aquatic ecosystems and fishing areas on the Columbia River which already have multiple burdens to contend with, harm public health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Please consider these impacts in the scope of the Environmental Impact Statement and think about the overall health potential of Washington State's citizens and environment. Let's make wise choices - it's time. Thank you,
—Elizabeth Carr, Olympia, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Deborah Richards, Tacoma, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Brian Westra, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sara Wilcox Seeley Lake Wilcox, SEELEY LAKE, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, This is just crazy - at a time when global climate instability is affecting more and more of the world, it is not time to be sinking money into expanding a coal-based energy infrastructure, at home AND overseas. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest, to be burned in Asia. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Brenna bell, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janet Rexroth, DuPont, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—susan evans, Days Creek, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Timothy Keeler, Kenmore, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kevin Havice, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—adrianne bolach, Marysville, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I live in Montana. We are already, and have been for many decades, experiencing the negative impacts of coal mining on our environment, air quality, water quality and communities. Over the last few years the number of coal trains that pass through the middle of town has greatly increased and it sickens us --literally and figuratively. I watched such a train as it passed along the Yellowstone River near Big Timber, MT -- at first we thought it was a fire because these massive plumes of dark black smoke were blowing off of the coal...and settling onto the Yellowstone River! Our waterways cannot afford coal dust, which is full of heavy metals. Our air, our bodies, our landscape cannot afford it anymore either. We as a nation have the science to DO BETTER THAN FOSSIL FUELS, and WE LOSE when we rely on export of fossil fuels! Nations like the US, Canada and Australia are, with their urge to push push push coals, fracked oil, and bitumen are endangering everyone and everything else on the planet. For what benefit So that the coal-burning nations like China can have even worse air quality So that acid rain can come back down over central North America So that we can destroy eastern Montana and northern Wyoming WE lose cultural resources, grazing land, wildlife habitat, fishable rivers and the beautiful landscapes our local economies REALLY depend on. Who gains Only the coal companies. And, frankly, they DON"T OWN US and it's immoral to say that they can benefit and everyone else's expense. They don't live here, don't give a hoot what becomes of the rest of us. Our local economies need to be given the chance to support themselves without becoming dependent on coal exports, and the Longview terminaly is a BAD IDEA because it only creates the need to dig/ship/burn more coal. Get with the 21st century -- we DONT NEED COAL! WE NEED RENEWABLES! NOW! This is a personal fight for many, many people. The US is behind the times and we the people are sick and tired of being pushed around by the mining industry and "energy" companies and their cronies in D.C. For once, let's do the RIGHT thing and SAY NO TO COAL! By the way, I think it was mighty suspicious that YOU DID NOT EVEN HOLD A MEETING IN MONTANA, where the coal would come from. That's a sleazy tactic, but, as you can see, we Montanans are still going to comment and still going to say NO MORE COAL PORTS! NO MORE COAL MINES! Please include my concerns while conducting and completing the Environmental Impact Statement for the potential Longview Terminal. Thank you,
—Laura, Helena, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Barbara Temple-Thurton, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Export coal. Kill the planet. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karl Eysenbach, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Julie Quenemoen, Bozeman, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael Savatgy, Deming, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Caroline Allen, Sammamish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, John power
—john, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kenny Parsons, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matt Remle, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Edgar Meyer, Cashmere WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tim Tompt, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. There is no location on our west coast that should be used to transport coal to China. 1. It is impossible to analyze the impacts such a massive port would have on the river ecosystem, the air quality, the effect on the ocean of the added pollution load to the mouth of Columbia on top of all the other impacts to the communities and the people. 2. In addition, building such terminals would aid in the devastation of Montana's ranches, rivers and the present preferred economy of eastern Montana. 3. It is global suicide to encourage in any manner, including coal ports, the mining and burning of fossil fuels in our country or in Asia. We breathe it all - can you measure that Please be very consciencious in your efforts to produce a very thorough and intensive EIS. Every detailed impact on the environment should be noted. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Darlene L. Grove, Stevensville, Mt, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Britni Weaver, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Chaney, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lura Irish, Lakebay, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mark Rice, Kirkland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Greg Iverson Esq., Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laura Geiger, Auburn, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. What is the carbon footprint of coal, one of the dirtiest forms of energy, from the center of the US to China China already had cities that were filled with unbreathable air 20 years ago! How can this be good for the overall health of our planet I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marcia Monma, Clinton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Selove, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Seth Rigles, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Christine Albrecht, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a pediatrician I take care of many children with chronic asthma who need to take daily medication to control their symptoms. Asthma is aggravated by air pollution. On a larger scale the burning of coal here and abroad also contributes to negative impacts on respiratory health, particularly in all of Asia where the coal is headed. That and the effect coal has on carbon emissions, green hours gases, global warming and devastating weather events both here and abroad requires us to think of environmental impacts at home abroad and to the entire interdependent planet. It's time to leave the coal in the ground and promote clean energy at home and abroad I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Catherine Thompson, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dennis Meiners, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Stan Hoffman, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael Hyman, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—jake, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Mary Keeler, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Christina Dickinson, South Colby, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jordan Goldwarg, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amanda Sloane, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Please, in the interests if everyone in Washington state and throughout the world, do not allow the the construction of a coal export terminal in our state. We are so fortunate in Washington to have the natural beauty, our fisheries, and quality of life, and coal is damaging to all of these things. It is dirty and not the type of energy we should be investing in. Surely, short-term jobs are not worth jeopardizing not only our life here in Washington, but also the very survival of our planet. Thank you, Rachel S. Imper 16929 Ingkewood Rd. NE C202 Kenmore, WA 98028
—Rachel S. Imper, Kenmore, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janice Colvin, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Coal is a huge contributor to greenhouse gases, and, wherever in the world it is burned, it will end up having a negative impact on Washington's environment via climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Felicity Devlin, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matthew Heerschap, Edmonds, WA

—Katie Rubio, Mount Vernon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Alan Hoeffler, Mesa, Arizona, AZ

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA. Mining and shipping coal negatively affects the environment at the mines, in the communities the trains pass through, in the cities where the coal is ultimately burned, and contributes to global warming. Put more simply, it's bad for everyone. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lucia Vojtech, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Alvin Fischer, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mark Ditzler, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—joan sJsttembridge, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary K. Witter, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Miriam Edell, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diana Richardson, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, The coal export terminal will bring jobs to our community. However, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The strongest support for this project come from the economic benefits that will accrue to our community. However, I've yet to see anyone say that this project will bring more jobs than, say, investing in companies such as Tesla, SolarCity, or other companies that are not only investing in clean energy, but creating new jobs and skill sets for a changing economy. I urge you to re-consider this project as its benefits do not seem to outweigh the costs to our community, our planet, and our future. Thank you,
—, portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Keith Milligan, Veradale, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—M Mairata Frankwick, Lake Oswego, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bailey Nickel, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marcy Summers, Vashon Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amelia Petersen, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Do not enable polluters by making it easier to pollute. Never fossil carbon in the ground unoxidized. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Roth, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, You KNOW this is wrong -- to construct ports for the purpose of exporting coal overseas. I fought against the port in Bellingham and will fight to keep coal trains out of Longview. You know full well the health risks to the population. That is why I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Beverly Nelson, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol Kirkbride, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nan Henriksen, Camas, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sherry Riesner, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda Pastor, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Steigelman, Battle Ground, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sharon Winnett, Billings, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect communities by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pam Borso, Custer, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement NEPA requires that the significant impact to be identified and mitigated. If this is not done then the EIS will end up in court. Thank you,
—E. Ivan Ivan white, Kent, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Kristina Lefever, Ashland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Barbara Reid, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jane Griffen, Portland, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Melanie MacKinnon, Roseburg, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lee Stafford, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Brock Olson, Spokane, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Gordon Wood, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Wyoming is being sacrificed for ever increasing fossil fuel energy production. In 2008 it produced 462 million tons of coal, more than the other top three coal producing states combined. In coal cars that much coal would circle the earth two times at the equator. Wyoming is responsible for destroying the atmosphere with CO2, more so than most nations. Duane Keown, Professor Emeritus, Science Education, University of Wyoming
—Duane and Joy Keown, Laramie, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—amy odean, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Timothy Wood, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Franklin R Vincenzi, Arlington, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Montesano, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Christopher Hutchison, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robin Moore, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—James L Tyree II, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Donna R Heath, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Larry Mahlis, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. We need to be thinking about clean options. This isn't one of them. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kim McDonald, Marysville, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Brooke Holmes, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jacquelyn Schilling, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lyle Collins, Yakima, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sarah Vautaux, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gregory Ojala, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ms. MJ Hanson, Lander, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Caroline Choquette, Philomath, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mark Edward Hedington, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly ENCOURAGE the construction of a coal export terminal at Longview, WA which would transport coal on ships, from railway deliveries, through the Northwest rail lines. This proposal would POSITIVELY affect my community by increasing employment opportunities and bringing revenue into the local economies. The ephemeral environmental impacts from the transport and use of the coal resource are not measurable and are also not pertinent to the actual facility that is being proposed being proposed for permit. I urge you to consider this when compiling and finalizing the Environmental Impact Statement. Thank you,
—Donovan Brady (COAL = JOBS), Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Arlys Fones, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Martha Perez, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Phillip Mahaffey, Ontario, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steve Rauworth, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jeanne Alberts, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Please do not allow construction of the proposed coal transport terminal at Longview, WA. This project has the potential to wreak immense harm on the health and economic well-being of the Columbia River communities. I live in the Portland area and often visit the small towns and natural areas of Washington and Oregon that border the Columbia River. I am appalled at what might happen to the people living and working in these areas when the coal dust from open train cars settles on their homes, yards, streets, fields, and ultimately in their lungs. Transporting coal on trains and ships throughout the Northwest will negatively affect our communities by increasing congestion and noise, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. Please consider the possible damage to aquatic ecosystems and fishing areas on the Columbia River caused by increased tanker traffic, and the potential for shipping accidents and spills. This project is certain to escalate climate change, a real and present danger to human life on the entire planet. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Reverend Sue Ayer Unitarian Universalist Church Hillsboro, Oregon
—Rev Sue Ayer, Beaverton OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Meri Olmstead, La Grande, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Roullier, Philomath, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sally Hurst, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Michael A. Woodbury, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Platt, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matt Piccone, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. The USA has a surplus of natural gas and oil. Coal should be left in the ground and only used in the case of an emergency or national defense for the USA, as a last resort fuel. Only under those circumstances should coal be mined. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jerry H. Matsui, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. We are known and visited for our extremely beautiful environment and and the benefits of a less polluted landscape, many people are employed by keeping our scenery as pristine as it is. Please do not be so short sited as to destroy our livelihoods and the future livelihoods of all western citizens which depend completely on the value we have maintained in our states by keeping them as clean as they are, which is infinitely cleaner than this dirty and reckless industry has been, is, or will ever be. Thank you, Kristin Kohl
—Kristin Kohl, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nick L. Szumlas, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Eli Semke, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Claudia Johnson, Nehalem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Larissa DeHaas, Salem, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, As a long time resident of the Pacific NW and staunch environmental advocate, I am writing today to strongly oppose the construction of a massive coal export terminal at Longview, WA: a terminal which would receive coal by trains and barges from the Wyoming & Montana coal fields to be shipped to markets around the world. This proposal would negatively affect the many communities along the long route from the coal mines to the proposed terminal in Longview by increasing congestion and noise with more coal train traffic, polluting the air and local waterways, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and of increasingly importance to all of us, escalate climate change. I urgently implore you to consider these cumulative and significant impacts in the scope of the Environmental Impact Statement. Thank you for considering my comments on this critically important issue.
—Emilie Marlinghaus, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steve Thomas, Idaho Falls, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Stephen O'Donnell, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—George Iftner, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Wendy Little, Oregon City, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Preston Sahabu, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Amongst the other reasons I strongly oppose the construction of a coal export terminal at Longview, WA and encourage you to do so as well is the fact that air pollution in China is so intense that it is causing public unrest. It is unclear that the Chinese market will actually be long term economically viable. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dr. Kari Marie Norgaard, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sally Goodson, Camano Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andronetta Douglass, Blaine, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Doering, Walla Walla, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cynthia Hillard, Covington, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Maureen Kill, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ruth McD, Redmond, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Paula M Wilson, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Peter Hapke, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community of Bozeman, Montana because it would block access between two halves of our town. It would prevent people on the side that does not have medical facilities from getting to the hospital. The coal producers, the coal shippers, the railroad and the federal government have not offered to underwrite the infrastructure costs necessary to avoid this massive disruption! They're making money. We pay the cost of a huge tear in the fabric of our community. Bozeman is not some small town during the 1850s that could just get up and move to be near or far from the noisy, dirty congestion of traffic. Bozeman is the 4th fastest growing area in the entire United States. Shipping coal west is unacceptable for the reason that acid rain from burned coal arrives back in the U.S. in only seven (7) days. We cannot live with acid rain unless we give up eating. Other people have additional valid reasons for opposing coal. No coal exports, and let's develop alternative fuels for at home also. You must consider these negative effects on U.S. communities in the scope of the Environmental Impact Statement. Otherwise, you are making war by destroying viable, valuable, and largely beautiful American communities. Thank you,
—Carol Stahl, Bozeman, MT
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathleen Beynun, boise, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems given the significantly large number of salt/freshwater shorelines currently accommodating railroad tracks in Washington State alone, the impact of coal trains on our shorelines will be environmentally devastating, and this damage will only be exacerbated in the event of a train crash. Because of the magnitude of impact on the immense mileage of shoreline currently impacted by railroad infrastructure in Washington State. Just because the railroad might own the shorelines impacted by railroad infrastructure, it only further demands additional environmental stewardship; the environmental studies need to include ALL of the shorelines where railroad infrastructure exists, not just the sites where offload facilities are being proposed. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Boettner, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. —Mr. Dana Weintraub, Beaverton, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sam Crespi, Arlington, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tom Kane, Hubbard, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Corona Sodemann, Talent, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Although live in Montana, I am writing because a terminal of this size would negatively affect the NW all the way to Montana and Wyoming. This proposal would negatively affect my community in Montana by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, and expand strip-mining in Wyoming and Montana. And then, after coal was shipped west, the pollutants would be sent back to us in the air. Not only would this escalate climate change, it would harm the health of US citizens. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Susan R. Perin
—Susan R. Perin, Bozeman, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Although I live in Bend Oregon the effects of burning coal anywhere in the world effects all of he and the health of our planet. I do not want Washington or Oregon to contribute to the destruction of out state, country or planet. We an do better. We can be leaders of a new cleaner world. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Beverly Endicott, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Shaun Winter, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, My wife and I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect our community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. We urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Kysar, Lake Oswego, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lorraine Potter, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Keller Cyra, Vashon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Cooper Morrow, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Claudia Owen, Cottage Grove, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, It's the 21st century, and it's time to develop sustainable, renewable energy sources. Building a terminal to send coal overseas is just insanity. The Pacific Northwest is a precious jewel that we must protect. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Emma Cornell Ph.D., Lakeview, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Megan O'Brien, San Jose, CA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dr. Terry Lesh, Cottage Grove, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bob Rolsky, Suquamish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. This is all bad enough, but we would also be complicit in mountaintop removal, which creates its own environmental holocaust. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gaia Quay, Portland, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Francesca Varela, West Linn, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This isn't just a "NOT IN MY BACK YARD" cry. This is a "Not on my fragile Earth, on my watch" plea. As a citizen of the unique planet Earth, I don't care that world corporations and (mostly American) individuals want to consume all the available fossil fuels at all costs. I don't care that change will be inconvenient, personally disruptive, or even dangerous. NOT CHANGING is far more dangerous, for more disruptive, and morally unacceptable. I urge you to consider worldwide impacts of raising the temperature of the planet Earth in the scope of the Environmental Impact Statement. Thank you,
—Melinda Brown, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Zoey Kapusinski, Walla Walla, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diane Hardee, Monroe WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Sadzikowski, Oregon City, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community here in Manhattan, MT increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sue Frazier, Manhattan, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathy Moran, McKenna, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Hanke, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chris Conrade, Portland OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Thomas and June Esposito, Sparks, NV

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Besides negatively affecting the communities through which this traffic will pass by increasing congestion and noise with more coal trains, polluting our air and local waterways, harming existing businesses, and delaying emergency responders, it would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. The Columbia River is not only a siginficant waterway for the economy of the area it is part of a very large ecosystem which needs to be preserved to maintain the health of the planet. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Harriet Edith Roberts, Eugene OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marilyn Hoban, POULSBO, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert Grimm, Fall City, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mrs Kristin Meijer, Kirkland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Greeley Wells, Jacksonville, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Even more important, every ton of coal taken out of the ground brings us that much closer to climate catasrophe. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jerry McConoughey, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Kate Mullins, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gabriel Lavalle, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Now is the time to take a stand against short-term private profit when it comes at the expense of long term public health and safety. Thank you,
—loren willson, puyallup, WA

US Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA, which would transport coal on trains and ships throughout the Northwest. This proposal would harm my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate global warming. I urge you to consider these impacts in the scope of the Environmental Impact Statement. The environment is national security; pollution is treason. We need a global ban on fossil fuels. Signed,
—Danny Dyche, Hillsboro, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Alison van Dusen, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I oppose the construction of a coal export terminal at Longview, WA which would transport coal from trains and ships throughout the Northwest. Coal ain't clean, as you know. This proposal negatively affects my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It also damages aquatic ecosystems and fishing areas on the Columbia River, harms human health, increases tanker traffic and the potential for shipping accidents and spills, expands strip-mining in Wyoming and Montana, and escalates climate change. NOT good things, eh Consider these known and documented facts in the scope of the Environmental Impact Statement. Thanks for doing a good job on the review.
—Kent Mollohan, Helena, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pam Cook, Belgrade, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan Sherwood, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lisa Hodges, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Melvin Mackey, Vashon, WA, WA

Dear Cowlitz County Commission, My wife and I recently moved to Longview. We are both professionals. My wife is a practicing physician working in Longview and I am an award winning documentary filmmaker. When we first moved here we immediately started looking for a home to purchase. Luckily, we learned about the proposed coal terminal before buying a house. Instead of Longview, and as a direct consequence of the proposed coal terminal, we purchased land and are building a home far from Longview. We had hoped to stay, but because of the serious environmental risks of coal we have chosen to live elsewhere. We are very much locally oriented and would have certainly been spending the majority of our money in Longview. I hope you will say no to coal, but we couldn't take the risk that you might allow the terminal to be built, so we won't be here either way. Thank you for your time,
—Christopher Dudley, Longview, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Leo E Faddis, Kuna, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lynda Wilson, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Daniel Swink, Vancouver, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sally Lowell, Jacksonville, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mary Twombly, Cook, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Clarissa Mansfield, Bellingham, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. While the local impacts are quite serious, the impact of burning more fossil fuel on our planet's health is beyond serious. It's catastrophic. Please be part of the solution. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andrea LePain, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Scott Zimmerman, everett, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, We all know the time for using coal is over. Step into the present. No coal exports. No coal terminal in Longview. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol G Sword, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—David Sielaff, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matthew Evinger, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Think about your children. They may grow up with money and food and all the resources they need to survive, but when they are your age, what kind of world will they live in Will they be able to breath the air Will they be able to find water Will they be able to find food The answer to all of these questions is uncertain if you let this coal terminal be built. Even if we aren't the ones burning the coal, we all live on the same planet, with the same atmosphere. Green house gases on the other side of the earth affect us just as much as they affect people in China and South Africa and Chile. For the future of our children, please do not let this coal terminal be built. Thank you,
—Tyler Wilson, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Morgan Giring, Bellevue, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Not only would this proposal escalate climate change, but it would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Joline El-Hai, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Philip Bryer, Eugene, OR

—Joanne Kelly, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tim Larson, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—jAMIE iSALY, Bozeman, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jan Sodt, Auburn, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Shannon Davis, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jim and Sharon Price, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Caitlin Matthews, Portland, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Amanda, Denver, CO

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Heather Foster, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laurel Pace, Eureka, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert E. Longnecker, Longview WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Julia Briggs, Snohomish, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The coal provides the fuel that will increase global warming and will poison the environment wherever the trains and ships transport the coal. This proposal would negatively affect multiple communities by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Anne Millhollen, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Molly Grove, Bend, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I STRONGLY oppose the construction of a coal export terminal at Longview, WA. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nina Montenegro, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Scarlett, seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andrea Flora, Wolf Creek, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jennifer Stamm, Mount Vernon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nancy Swanson, Lummi Island, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gretchen Olsen, Goldendale, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robin Hirsch, Orcas, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Wennlund, Ashland, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Victor Roberge, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—R. A. Larson, Mount Vernon, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kelli Foutch, Moscow, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Larry Sukut, port orchard, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. In my opinion we need to work together to find safe, climate friendly fuel sources that do not endanger the heath of our planet and our communities. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Katherine Jentoft-Herr, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Steve Bear, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jonnel Covault, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Molly B Clark, Big Horn, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I would like to begin by stating Federal, State and Local agencies are tasked with protecting Public health and safety. Through your mandate it is essential that Public agencies connect the dots. This means it is impossible to isolate projects from their impacts. If this project will result in more coal burned and pollutants put into the atmosphere then the impacts of global warming must be considered. This project would include putting more coal into the waters of the Columbia river. It would put more huge ships loading tons of coal over the waters of the Columbia river. The Columbia river is home to many species of fish, some are endangered and in need of protection, not more insults. The EIS of this proposal must include studies to show effects of coal dust on salmon and sardine survival. This proposal adds a huge number of large ships traversing the sand bar at the mouth of the river, some of the worst weather and waves in Washington state for vessel traffic, what would be the effect on one cargo ship running aground at the mouth of the river This EIS must include an assessment and the impacts to the migrating salmon from propeller wash, noise, vibrations, balast water leaking into the waters of the Untited States jurisdiction. The migration of salmon mirror the shipping lanes through the Alutian Islands of Alaska on the way to Asian markets. This increase in traffic must be addressed as this shipping corridor is dangerous and getting more crowed. This shipping corridor impacts the Bristol Bay Salmon migration and the impacts to that valuable, (more valuable than coal!) resource. Pretending this proposal will not effect the environment beyond the exact perimeter of the land in Longview is ridiculous and the Public deserves to know how one proposal can impact everything else along the way. I oppose any project that puts communities at risk for no benefit to those communities along the tracks, near the terminal, and those of us with lungs to breath the polluted air. The increase in train traffic has already negatively impacted my life. I get less sleep as the trains run at night, last week there were three trains, one every half hour, through the night. One engineer sounded the horn 12 times, I counted, the sound of the horns, the squeal of the wheels, the diesel engines, up to 4 per train all contribute to negative impacts. The value of my property is down, the cracks in my driveway are bigger, the sink holes in my lawn keep appearing. Please include in this EIS the effects of sound, vibration, and exhaust from more train traffic on the lives of children and adults along the train tracks. Please include the risks and benefits to the communities that will have to live near the tracks and near the shipping facility and those of us that eat fish contaminated with mercury and those of us that can still expect to breath clean air. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Your job is to ensure American citizens have clean air and water. Your job is not to create an export facility. Thank you,
—Laura Brakke, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sarah Bean, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Susan Calhouns, Happy Valley, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Our coast with it's oyster beds, clams, fish, is too valuable to risk with increased coal train traffic. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jann VanOver, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bram Novak, Baker City, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jessica Dean, Richland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The guidance from the CEQ on meeting the mandate of NEPA requires the federal action agency to consider reasonably foreseeable related actions and impacts, and the cumulative impacts mandate also requires consideration of reasonably foreseeable cumulative impact from this action and all other existing and future human activities. The intent of these mandates from NEPA is clearly to avoid piecemeal consideration if actions that will lead to piecemeal degradation of ecosystems. Accordingly, you MUST consider the burning of the fossil fuels and their overall impact on the atmosphere and the ocean. I am an ocean scientist, and Oregon has already had a hatchery failure in Netarts Bay due to ocean acidification. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Gregory McMurray, PhD

—Greg McMurray, Lake Oswego, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. Time to move on to other energy sources which do not pollute. Furthermore, we do not need the pollution generated by merely shipping coal across our state to go elsewhere. Bad deal all around. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Robert S. Thompson, Enumclaw, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Jeff Walton, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing pollution, rail traffic congestion and general ugliness of the cities and towns this dirty rail traffic will go through. The negative safety factor is another issue. noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,

—Mary Detweiler, Curlew, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Baker Conte, Walla Walla, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Eric Concannon, Lander, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Zachary Steward, Medford, OR, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Daniel Trovillion, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jeff Hummel, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kelly McConnell, Tigard, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Law, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matthew Loar, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Trout Lake, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elizabeth Taylor, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Elizabeth Sloss, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nick Barcott, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Why is this project and the increase in exporting of coal to China even being considered! The mining of coal and the infrastructure required to export it to China uses our tax dollars in the form of subsidies directly and indirectly. How can we afford this How can this be justified How much in direct and indirect subsidies are going to be used or are already being used The People's Republic of China is the world's largest consumer of coal, using more coal each year than the United States, the European Union and Japan combined. Coal power has been the dominate source of energy used to fuel the rapid economic development of China. Many carbon-industries in the U.S. are moving to China because of the less stringent environmental codes, cheap labor and vast coal resources How can our economy afford the job loss that is a result of this coal going to China China's leaders have vowed to improve their nation's energy efficiency, but have been reluctant to approve the extra spending to do that. Every week to ten days, another coal-fired plant opens somewhere in China using old style equipment; equipment that has a 75 year lifespan. China's coal-produced air pollution reaches the United States. Studies show that particles of iron, titanium and other elements are being sent airborne and are reaching the U.S. These particles are dense enough that, at maximum levels during the spring , they account for a fifth or more of the maximum levels of particles allowed by the latest federal air quality standards. These particles effect the higher elevations and not lower lying cities like Seattle. Over the course of a year, Chinese pollution averages 10 to 15 percent of allowable levels of particles. How is this increased air pollution being monitored How is this increased air pollution being mitigated Renewable energy is the future, not fossil fuels I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. How can we say NO to this project Dolores Andersen
—Dodie Andersen, Missoula,

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Vernon Huffman, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, My county in North Idaho would be adversely affected by numerous coal trains which would stop traffic on our major roads and highways at all hours, not only blocking school buses and local citizens, but even worse, our vital EMS providers would not be able to respond in a timely and safe manner. Our air quality would be severely impacted with dangerously elevated levels of hazardous coal dust. Our waterways and lands would be impacted with hazardous heavy metals and other coal dust contamination. Wildlife would be exposed to these same dangerous air, water and soil contaminates, as would all of our human population. Increased asthma and other respiratory diseases as a result of the coal dust in our communities, along with elevated blood levels of heavy metals. This certainly is a very negative local impact, one that is certainly at odds with public health and safety. Northern Idaho would be adversely affected by western coal trains traveling across our communities. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nikki Pacheco Theard, Coeur d'Alene, Idaho, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Naomi Fisher, Goldendale, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—John Walenta, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dodie Moquin, Missoula, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lezlie McDaniel, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—AD Butz, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kiwibob Glanzman, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sarah Salter, Lynnwood, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Tracy Ouellette, Bow, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mike Sennett, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Linda Lindsay, Langley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Carol L. Kibble, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Benjamin R. Roth, Jackson, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pedro Zapata, hillsboro, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. We know that there is no such thing as "clean coal" and now is the time to come to the realization that as a species we have no choice but to power past coal and oil or we will most certainly poison the earth we all live on to the point of making it un-inhabitable. If not now when and if not us then who We can no longer afford to kick this can down the road. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dan Freeman, Clinton, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Barbara Wallesz, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Karen Peralta, Kenmore, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bill Irving, Hayden, ID

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Camille S Dohrn, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Viv Jeevan, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This is a time of global crisis. We face numerous, disastrous, and seemingly unresolvable consequences to the human-caused precipitous carbonization of our atmosphere. One thing is clear however: furthering that process--by facilitating even more carbon exploitation--must be avoided. We know the science. We know the consequences of our actions. Opening more coal terminals will increase coal output: a simply deadly action. To approve the terminal when we know it means death is morally unconscionable. Do not do this. Thank you,
—Michael Knapp, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ms. Doris S. June, Mulino, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Diane Deno, Tulalip, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Maureen burns, Maple Valley, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lynn Fawcett, Kalispell, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Daniel Buswell, Cornelius, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nick Heymann, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert C. Dickerson II, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River and the Missouri River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. There is NO Planet B. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathleen Gessaman, Great Falls, Montana, MT

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Keith Woelbing, Eugene, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Bette Sears, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Melissal Duffy, Oak Harbor, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Janiece Staton, Beaverton, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kathleen Wolfe, Des Moines, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I request that you include the ultimate that would result from allowing coal exports, which is the increased carbon load to the environment which will have negative environmental impacts in our area as well as negative environmental impacts in other areas of our planet. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Richard Heggen, Tacoma, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Johni Prinz, Ocean Shores, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andra Kovacs, McMinnville, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—jeff franz, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Chris Cooper, Beaverton, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Judy Anderson, Cottage Grove, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Skyler short, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, Do not sacrifice this world for pollution and profits! I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gabriel Iverson, Oregon City, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Gordon Inslee, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, At this time in global history, coal should not be mined, transported or burned. There is no excuse for failing to heed all reasonable scientific evidence of the vast harm done to humans, the environment and the climate from production and use of coal. It is an outmoded fuel source that should be left deep in the ground where it was made. I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Nancy Farr, Winthrop, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. We cannot continue to harvest and burn fossil fuels because of the limits to growth in carbon our atmosphere can hold before passing the 2 degrees C level determined to signal the end of livability for humans on earth, not to speak of the untold death and destruction to other life forms. We must make the shift to renewables and stop this harvest of death. The economic losses from stopping coal pale in comparison to the costs of the ecological damage coming to account. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Emily Herbert, Portland, OR
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA, which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect our communities with increased congestion and noise from more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Mark Ashley, Bainbridge Island, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, The construction of a coal export terminal at Longview, WA to transport coal on trains and ships throughout our region is a big-time loser for the Pacific Northwest and should die in infancy. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Robert and Gail Stagman, Mercer Island, WA
Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ken Winograd, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. The proponderance of scientific research so far indicates that the addition of more coal being shipped to Asia will significantly increase CO2 in the atmosphere. This will negatively impact the environment of the whole Pacific Northwest, including tiny Longview, WA. A finding of no significant environmental impact for this project would require you to ignore the global impact. please consider the broad impact of the request rather than an extremely narrow viewpoint. Please reject the request. Unleashing all that carbon is bad for the environment...everywhere. Thank you,
—John Thaw, Corvallis, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Dr. Joel Levey, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kai Ng, Wood village, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect the Longview community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sylvia L. Shriner, Ellensburg, WA, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Kevin Darcy, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Sonia Scott, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Pat Bowman, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Lorinda Roland, Olga, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—, Lacey, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—OP KC Young, Kirkland, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect Washington State by increasing congestion and noise with more coal train traffic--and negativelhy affect our entire world and climate by polluting our air and waterways. The traffic would harm existing businesses, and delay emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. That's a lot of damage and negative impacts. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you, Alaine Borgias
—Alaine Borgias, Bellingham, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Andrew Letourneau, Damascus, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Alexander Flemmer, Hood River, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Madelane Coale, Everett, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Laurie Olson, Port Orchard, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Sandra Materi, Casper, WY

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Thomas Palmer, Gold Bar, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Marianna Iverson, Portland, OR

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I very strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. As a longtime resident of Bellingham I can assure that the just two trains that go through the city everyday spread coal's filth throughout our water ways and rail side forests. Don'r let a massive shipper tear apart everything that is good and beautiful about Longview. This proposal would negatively affect Seattle and every other town with rail lines in the state, by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. These trains also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Arynn Mckenzie, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Ruth Huffman, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Matt, Seattle, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. —Ruth G. Haasl, Port Townsend, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—Jeremy Wells, Kent, OH

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement. Thank you,
—jerahmeel Rueben Males, Olympia, WA

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission, I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest.
