

October 24, 2016

Dear US Army Corps of Engineers,

I support the "no action" alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS).

Millennium's proposed coal export terminal would harm my family with the most intense impacts felt in my hometown Longview, Washington.

The proposed terminal site is less than a mile from the center of our town, home, schools and parks. The project would harm our health and safety, air and water quality with this very close proximity.

With some of our family also in Rainier, we have real concerns about delays getting to the hospital or any emergency situations that may arrive because of train delays.

We are already hurting financially and should not have to pay for the rail with our tax dollars or lives.

I urge the Army Corps of Engineers to protect my community and family. Please reject the coal export terminal.

Sincerely,

A handwritten signature in black ink, appearing to read "Dawn Cemulini". The signature is written in a cursive, flowing style.
