PLEASE SHARE YOUR COMMENTS BELOW:

The bulk terminal will require transportation of the coal which, in turn, will cause health hazards due to the dust, emergency vehicle delays at crossings along the way and greenhouse gas emissions when the coal is burned. Renewable methods for producing power are now proven and storage technologies have made huge advances in recent years. We need to focus on job creation in these areas rather than continue to cause damage to human health and the environment.

Robin M Lead,
7150 S.W. Newton Place
Portland,
OR. 97225
