Re: Draft EIS comments of proposal in Longview

To Whom it May Concern:

Despite all the rhetoric to the contrary about coal exports, I firmly believe you can have both good family-wage jobs and be good stewards of the environment. It doesn't have to be a choice of one over the other.

This draft EIS is exhaustive and quite frankly, overreaching. For instance, because the proposal is a terminal proposal, the use of the bulk commodity by a third party is a superseding and intervening cause to the combustion of coal. As a result of these superseding causes, the construction and operation of the terminal is not a proximate cause of the combustion of coal. Enough already!

I applaud the agencies work on this permit process. The results will provide a more-than thorough "hard look" at the possible impacts of the Millennium Project in Longview which is needed to keep things moving ahead. Thank you.

Sincerely,

  
Dane Ashley
