*see here → you
thorough, intensive look
into coal as fuel to
be mined from the US*

PLEASE SHARE YOUR COMMENTS BELOW:

shipped to the West Coast, polluting air, water, soil and dust in everything it contacts creates (exponentially) more problems than it solves. Return of acid rain on the Cascades, Rockies, and all points in between cannot be undone. Let's take time to thoroughly think things through and together we can do the right thing. China recklessly burns coal as it phases it out and switches to more economically viable, simple practical energy solutions. We need not contribute to their dereliction at the expense of acid rain. Leave it be. Coal turns to diamonds.
