## PLEASE SHARE YOUR COMMENTS BELOW:

After submitting comment in the comment room I looked at the summary boards of the EIS. Much to my surprise there was no statement about the statistical probability of the number of people this system of coal extraction, transportation, and bunking will inevitably kill, maim & sicken. This needs a transparent health assessment. How many people per 100,000 in the areas touched by their coal and its pollution will die each year over a 50 year period what diseases will they develop?
