PLEASE SHARE YOUR COMMENTS BELOW:

We already see the effects of climate change all over the world. We know coal and other fossil fuels are a major cause of the changes we see. We need to rethink our economy and eliminate the use of coal, oil and gas if we want a future for all living things. We must think long term and not make decisions with short term profits as our only goal. There is no other home for us as humans. Once the earth is uninhabitable because climate change our story is over.
