I am writing because I do not want the coal terminal here ~~because~~ because I have a child with William Syndrome and has health problems, he was 3 months old with a cyst on his lung and had to be drained, he is almost 10 now. I have a daughter 5 years old who has allergies and coal will hurt both of my children in their health. I myself have sleep apnea and

(additional space is provided on the back)

Slight asthma and don't want or need extra coal dust floating in the air that we ~~per~~ breathe. I am not only talking for my kids and family but my mom + dad because they have a lot of health problems and they live close to the railroad tracks on the 300 block of Douglas. We live out more close to the place they want to make the coal transfer spot, which is in west Longview and we have been there for 5 years and say no to coal. We want healthy, safety for our environment, family's, friends, animals and earth. Also after listening to some speakers it made me realize how much more dangerous coal is to everyone especially the children that live and play within 10 mile radius of coal transportation because I have grown up here all my life and now understand a bit of some my health issues like: asthma, migraines, ~~had~~ thyroid, had a brain cyst in 2013 removed. I want to be able to live in a good environment, not all with coal dust all over. Also today I just learned how it affects children from prenatal and up and want to help put a stop to the coal.
