

Dear Washington State Department of Ecology, We the undersigned support the “No Action” alternative in the Millennium Bulk Terminals Draft Environmental Impact Statement (EIS). This proposal will have significant and detrimental impacts on Montana and the Pacific Northwest. Exporting Montana’s coal will cause air and water pollution, destroy wildlife habitat, create traffic congestion, and increase threats to public safety from increased train traffic. Most importantly, it will escalate climate change. We already have clean, affordable, and renewable alternatives that create thousands of jobs across Montana. We don’t need this destructive project.
