Comment on EIS for Millennium Bulk Terminal (MBT) September 1, 2013

c/o ICF International

710 Second Ave. Suite 550

Seattle, Wa. 98104

I am Zak H Zakovi living in Bozeman Mt. a native of Montana.

I am against the MBT because of the following reasons:

1. Shipping coal from Mt. and Wyo. by rail will impact hundreds of communities along the route to the shipping terminal in Washington. Emergency services – police, fire, health services will be delayed waiting at rail crossings.
2. Additional trains each day and longer trains powered by more powerful engines will add to emissions from burning diesel fuel.
3. Coal dust is a known health hazard and will increase with additional coal trains.
4. The burning of coal increases greenhouse gases and puts sulfur (acid rain) and heavy metals into the atmosphere.
5. Additional coal mining ruins the surface soils and water resources.

Thank you for requesting my comments
