

Coal Export
Longview, Washington
Susan Lee Schwartz

Please make a all encompassing Environmental Impact Statement (EIS).

Things I want you to look into for the Environmental Impact Statement.

16 trains a day will be coming to Longview every day.

Traffic congestion, will it effect crossing the bridge, getting to work?

Coal Dust, how often will we have to wash our cars, trucks, houses and buildings? Will we have to get our cars oiled more often? Will our car needs to be fixed more often?

Coal Dust has toxins in it. Will people with asthma, dry eyes, cancer and other health problems be affected?

What about the noise from 16 trains each having to blow the train whistle?

What about the Columbia River? Will the coal export effect ship and other travel on the Columbia River? What about the effect on the fish, oysters and other species who live in or near the river? Will there be any effect on the cranberry bogs?

Will the coal have any effect on other crops being grown in area?

What will be pollutants in the air and river do to our quality life?

What companies will not be locating here because Longview is exporting coal?

What about diesel fuel polluting our air and the effect it will have on people?
