Gentlemen;

Would really like to attend your Scoping Meeting in Spokane on Sept 25 but I will not as your last meeting in Spokane last fall was a total JOKE. It was set up for the pro voting unions. Everyone that spoke while I was there were union people in favor of these bulk terminals and all the coal trains involved. Then I found out the unions hired stooges to stand in line hours ahead of the meeting so they could dominate the testimony for this project. I will never again waste my time going to another meeting.

But as you can tell I am totally against mining coal in the US so that it can be sent to China so more air pollution can be created. And we in Spokane are not interested in more diesel powered trains and the associated coal dust that is created polluting Spokane's air quality.

Thankyou,

Bill LaPoint
