PLEASE SHARE YOUR COMMENTS BELOW:

Please do a Comprehensive review of the effect of the harvest and use of this coal taking into account extant government reports on anthropogenic global climate change, including reports and predictions authored by NOAA, NASA, the IPCC and the UN among others. In particular, please suggest how the increased impact of accelerating disease vectors, which is a knowable result of burning this coal, on the environment of Longview and its surrounding area. In short, we know that burning this coal

(additional space is provided on the back)

(comment continued)

will necessarily (sp) increase the incidence of diseases and the climate change fueled destruction of the natural environment, so how will that be mitigated,? Can it be mitigated?
