The addition of 18 loaded trains plus 18 empties per day threaten the quality of life in Kalama. The current noise level from trains is overwhelming. There need to be mitigation efforts installed to reduce this impact on quality of life. This increased noise also degrades property values.

Additionally the "at-grade" crossings must be improved with overpasses. The addition of these trains will be an ^{present} ~~severe~~ ^{oppressive} economic impact to the area businesses & transportation companies.
