

PUBLIC SCOPING MEETING COMMENT FORM

Please submit your comments on the Millennium Bulk Terminals – Longview Environmental Impact Statement by November 18, 2013 in order to ensure your comment is included in the scoping summary report. Comments can also be submitted online at <http://www.millenniumbulkeiswa.gov>.

To whom would you like to address your comments?

- All Agencies (NEPA and SEPA) US Army Corps of Engineers (NEPA) Cowlitz County and the Washington State Department of Ecology (SEPA)

Does your comment relate to one of the following areas?

Human Environment

- Noise
 Air Quality
 Human Health
 Transportation
 Other Human Environment Topic

Natural Environment

- Plants and Animals
 Marine Species, Fish, or Fisheries
 Wetlands or Streams
 Water Quality
 Other Natural Environment Topic

EIS Process

- Alternatives
 EIS Regulatory Process
 Other EIS Process Topic

This proposal is extreme: extreme in the amount of money and media sponsorship Millennium has spent; extreme in the lack of public input agencies have sought; and extreme in its disastrous effect on the region's health, environment, and economic future. Coal exports through Longview will destroy the community. Longview already has some industry that pollutes, but coal would cause such devastating pollution, it would cause most residents that can to leave. For those that are left, coal dust would add to the already poor air quality, and cause respiratory disease.

(additional space is provided on the back)

I am a ten year resident of Longview and Kelso. I teach young people at JCCC. I also volunteer in the Community. The area that will be most affected - the highlands - is an area I've visited often. In the past few weeks, I've spoken directly to residents there. There is widespread opposition to this project.

For example, a man in his 80's - who's lived in Longview most of his life - told me that this project was too questionable. He said, Longview needs jobs, but coal is not the way.

Most others are already affected. I families had children with asthma. I young mother had a child with an oxygen tank.
