- Marine Species, Fish, or Fisheries
- Wetlands or Streams
- Water Quality
- Other Natural Environment Topic

EIS Process

- Alternatives
- EIS Regulatory Process
- Other EIS Process Topic

PLEASE SHARE YOUR COMMENTS BELOW:

I am concerned about all of the above. Please have the most broad scoping as possible. Please include noise, air quality, human, plant, and animal health. Please consider the environmental costs from the mining process, each segment of the transportation process to include shipping to China, the burning of the coal in China, and the harms done to air, marine species, fish, or fisheries as the the CO₂ emissions make their way back to the United States. Please consider the effects to wetlands and streams and the water quality by coal dust and

(additional space is provided on the back)

(comment continued)

CO₂ emissions that will make their way from China to the United States.

I would like to see alternatives to the EIS process as well. I have sat for over two hours in a hearing and ~~there~~ is overwhelming opposition against putting a coal terminal in the city of Longview.

Please consider the levels of heavy metals that will enter all life forms should a coal terminal be placed in Longview.

Please consider the ^{psychological} implications of putting a coal terminal in Longview. Longview would become known as "a coal town." Coal towns do not bring to mind positive thoughts. Coal towns are places to be avoided. ^{possible}

I am concerned about the flight of professionals should Longview become a coal town.

I am hopeful that the permits will be rejected, and coal will become a "foul fuel" of the past. We can do better. We deserve better, our children, and grandchildren ~~also~~ deserve better. All other living beings deserve better. Who will speak for those who cannot speak for themselves.

Please consider all the science in this process.

Please reject Millennium's permit applications.

Please investigate the business practices of this company. Thank you.
