I work ^{indoors} next to the rr tracks in kelso where the coal trains are already rolling through. I have to wipe down my desk every few weeks due to the fine black dust that settles everywhere. Although I'm not certain it is coal, I ~~can~~ certainly have not seen dust that color ^{in areas further} ~~elsewhere~~ from the tracks. I'm concerned ^{about} ~~the~~ the impact on my health, my husband's health, and the future children I would like to have. The air quality here is already bad enough, I can't see why adding more pollution would be a good idea. The ^{potential} jobs are not worth the cost to public health. The people of this

(Cohetz co)

Community are already much less healthy than other ~~area~~ counties along the I5 Corridor (see the "Daily news" article about this from a few months back). We don't need yet another obstacle to health.

Also, my husband and I are homeowners & live near the Weyerhaeuser track behind Fred Meyer. I would consider that pretty close to the ^{proposed} trains/coal pile. ~~There are some other potential environmental issues at this location.~~ If the Millennium project is approved, we will be selling our home & relocating to a city that values health & the environment. ~~Also~~ I'm sure that other like-minded, well-educated, and productive citizens will leave as well. ~~So~~ I don't think that would be very good for the economy of the county. Who cares if there are more industrial jobs when there are fewer healthcare workers, contractors, ... etc there to provide necessary services?

The ramifications of allowing the coal terminal are more than we can ever imagine. Please don't allow this in our community!
