I am Against the TRANSPORT OF COAL WASHINGTON
to be sent to CHINA for the following

1. THE "SAFE" TRANSPORT OF COAL IS IMPOSSIBLE. The
number of trains constantly on the rails will
inevitably result in "accidents" that will
spill the coal into rivers, forest, fields.

I have listened to all of the arguments
today for & against coal exports. But I
have not heard one mention of what
will transpire when a mile of coal is

(additional space is provided on the back)

accidentally dumped into our environment

2. THE DEGRADATION of our environment by harvesting of coal at the expense of nature is shortsighted. The efforts & expense of extracting the coal should be put to use in developing alternative ~~and~~ "clean" energy sources. This would result in "more jobs" and not at the expense of our environment.

3. My FATHER told me stories about ^{his childhood where} ~~how~~ his family walk the tracks to pick up coal to take home for heat & cooking. They needed coal to survive. ~~Now~~ That was ~~over~~ hundred years ago. Today we must stop using coal in order to survive.
