# no coal export

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County,

I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Thank you

I'm concerned that the Longview Coal Export Terminal  
will cause increased health problems  
from coal dust and diesel fumes  
and traffic congestion delaying  
fire and ambulance service.  
Please study the impact of health issues all along the  
train route and through all cities  
and towns from Montana to  
Longview
