# no coal export

Dear U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County,

I strongly oppose the construction of a coal export terminal at Longview, WA which would transport coal on trains and ships throughout the Northwest. This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, increase tanker traffic and the potential for shipping accidents and spills, expand strip-mining in Wyoming and Montana, and escalate climate change. I urge you to consider these impacts in the scope of the Environmental Impact Statement.

Thank you

I'm concerned that a too limited scope of review would not consider long term impacts on health & economic sustainability - impacts resulting both from local pollution & pollution created all along the chain of use.  
Please study the impact of long term impacts on air & soil quality all along the transport pathway to the proposed terminal, river & road traffic congestion, & any potential health impacts on socio-economically disadvantaged individuals & communities and population levels of fish & other commercial species in the river
