I live in Colfax where a train de-railed and fell into the river and it was because they pushed the train to go faster than it should have been going and the cars fell into the river. The tracks were not designed for that speed and were too old to handle the speed and weight of that train. That spill was in late 2003 - early 2004. When you play next to a creek or stream and the stream is poisoned it destroys your familiarity with things growing and makes people's minds poisoned as well.
