I'm not for coal trains going through Spokane the main big issue is amount trains proposed long term future I heard up to 60 or more trains when going full capacity. I believe if going run any coal trains current or future the loads must be fully covered lids on Rail cars. And all Railroad crossing affected by the coal train industry must provide Viaducts ^{Bridges} Overpasses so traffic people can get across. I believe Coal Train Companies must pay for all these improvements to the Traffic ~~Info~~ ^{Infrastructure} Infostructure.

(additional space is provided on the back)

Otherwise Spokane is not getting 0
zero benefit. The ~~jobs~~ ^{proposed} are only currently
Western Washington & MT&WY mining where
coal will be mined Not Benefitting Spokane
~~Not Even a one Plug Nickel~~

All This Coal is going to China which
I believe is totally wrong. Instead
if coal burning is clean then ~~we~~ we
The United States of America
should be using are own resources not
foreign Communist Country like
China. The United States of America
also has growing huge energy needs
for future so coal is clean then lets
build so we United States of America
is getting future energy needs not
foreigners benefit. So I'm against
Future Coal Trains going through
Spokane.

Also if coal Trains do run through Spokane
Then 5% of ~~income~~ ^{profits} shall be given
to all towns & Cities affect by
BIG COAL SO I SAY NO TO
COAL.
