- Other Human Environment Topic

#### Natural Environment

- Plants and Animals
- Marine Species, Fish, or Fisheries
- Wetlands or Streams
- Water Quality
- Other Natural Environment Topic

#### EIS Process

- Alternatives
- EIS Regulatory Process
- Other EIS Process Topic

## PLEASE SHARE YOUR COMMENTS BELOW:

I've learned to live with the trains passing a half block from my house, but my concern is with the impact on the environment of burning fossil fuels. We must consider the health and environmental effects of allowing the shipment of this environmentally destructive product. It does affect us, ultimately, even though the coal may be used in China. To allow these shipments is to be complicit in the degradation of the planet. We can't afford this, no matter how many jobs might be created.

(additional space is provided on the back)

Of course, I am concerned with the air quality in this area where inversion is frequently present. I am concerned with the threat to our aquifer posed by the refuelling depot, and by the impacts of possible derailments. I am concerned with the impact on surface transportation and emergency services, and the enormous cost ~~to~~ to provide infrastructure improvements. Who would pay for these if they were provided?

If we need improved facilities for shipping grain and other commodities, we can build them. It is not necessary to hold them hostage.
