As a health care provider, I am adamantly opposed to promoting the use of the dirtiest fuel source currently available to man. Humanity's short sightedness will surely do us all in if we don't start making better choices for our environment. Money's job creation is wonderful, but if the price you pay is air quality (like that we saw in China during the olympics!!) and respiratory disease & cancer, it's not worth it. Please support environmentally conscious industry.
