I have a lot of concerns about the proposed coal terminal. Top concern would be health, I am worried about coal dust, in the air, in the soil, draining into our rivers... it will cause many respiratory issues, ruin the quality of water that is not only important for people living in the community but also affecting the wildlife. We are a big fishing community and the quantity of fish are already on the decrease. If we are to allow coal to our home it will only worsen the quality of life for plants, animals, people!

(additional space is provided on the back)

(comment continued)

I am also concerned about traffic congestion. I am worried that intersections will be blocked as we wait for trains to pass. Our tax money will have to go to repairs of the intersections where the heavy trains will be vibrating and causing more "wear & tear" on our roads / rails. I worry about the noise these trains will bring from the engines, the rattling of the coal cars, and the whistle blowing at every crossing... He plus trains a day is A LOT of noise!

I am for jobs but we can find an alternative to a coal export facility. I know there are other options out there to bring into a 400 acre of land. We don't need to open new mines in Montana for a dirty fossil fuel that's use is on the decline.

I would like the impact that this proposed terminal to be studied from beginning to end... not just my home town of Longview. Please look at the impact that ~~coal~~ coal will have on our quality of life.

Thank You  
Tiffany Heroux
