PLEASE SHARE YOUR COMMENTS BELOW:

I am asking for a broad scope EIS. Among my concerns are the water quality impacts from the mining, transporting, and burning of coal. What will happen to the water bodies near the coal mines? How will they be negatively affected?

What will happen to the bodies of water along the transport routes of coal trains. How will the water along the train tracks be negatively affected?

(additional space is provided on the back)

(comment continued)

What will the negative impacts on the oceans be from the shipping of coal to China?

What are the negative impacts on the water in China from the burning of coal?

There will be blowback from the burning of coal. What are the impacts to the oceans from the fallout of burning coal?

The blowback from the burning of coal will reach the United States. What ~~are~~ are the negative impacts from burning coal to the waterways in the United States?

Please consider the effects to water from start to finish from coal.
