## PLEASE SHARE YOUR COMMENTS BELOW:

My main concern is the climate and the wide-ranging changes that are already underway affecting human life directly – super storms, fires, heat waves, etc. The burning of fossil fuel resulting in 400 ppm CO<sub>2</sub> in the atmosphere is likely the cause. Burning of <sup>exported</sup> coal shipped through the Millennium Terminal will affect the next generation of humans – the children. It will adversely affect the forests, the agriculture we depend on. Please acknowledge that enabling coal export denies climate change + harms us all for decades
