6 to 1 redshirts to blue shirts should get your attention. These folks are participating in our democracy.

It has puzzled me: Why does Amber Energy, an Australian company (with a poor record in Australia + a reputation for dishonesty there and here), get to mine coal in the USA (on the cheap) to sell to Asian markets for profit? That's not right.

The advance of global warming is accelerating, fast!
We need to heed this fact + problem solve.

(over)

(additional space is provided on the back)

Dependency on coal is declining for economic reasons; but it should decline for wider reasons. It is dirty, unhealthy + impacts our communities poorly.

Train traffic increases are wrong for our communities for all the reasons you have heard today.

We need to keep changing our energy paradigm and to steer us into cleaner energy choices. This is a great time to stand up for that change.

Focus the scoping on the widest parameters. Show the courage to deny this Millennium project.

Just look at Appalachia for outcomes. It's not pretty!
