

PUBLIC SCOPING MEETING COMMENT FORM

Please submit your comments on the Millennium Bulk Terminals - Longview Environmental Impact Statement by November 18, 2013 in order to ensure your comment is included in the scoping summary report. Comments can also be submitted online at <http://www.millenniumbulkeiswa.gov>.

To whom would you like to address your comments?

- All Agencies (NEPA and SEPA) US Army Corps of Engineers (NEPA) Cowlitz County and the Washington State Department of Ecology (SEPA)

Does your comment relate to one of the following areas?

Human Environment

- Noise
 Air Quality
 Human Health
 Transportation
 Other Human Environment Topic

Natural Environment

- Plants and Animals
 Marine Species, Fish, or Fisheries
 Wetlands or Streams
 Water Quality
 Other Natural Environment Topic

EIS Process

- Alternatives
 EIS Regulatory Process
 Other EIS Process Topic

PLEASE SHARE YOUR COMMENTS BELOW:

I think that coal is not only detrimental to our health and wild life, but it is outdated too. Wind power and solar power is a smart, reliable source of energy. Also, solar panels don't cause illness. ~~Coal~~ Coal does. Coal is terrible for sea creatures like dolphins, whales and fish like tuna and salmon. It can poison animals, forests, and water sources. And if water is polluted, people who drink it get sick. I also think that

(additional space is provided on the back)

(comment continued)

the ways that coal is obtained ~~are~~ are bad for everyone. Regular drilling is bad enough, but when people cut off the tops of mountains, the effects are even worse. Coal dust pollutes water. Coal that is shipped can leave pollutants in the air. And when coal is burned, it leaves poisonous fumes in the air and contributes to global warming. Rates of asthma have gone up in the past few decades and that is probably linked to coal. Shipping tons of coal through Oregon and Washington every day would be bad for people, wildlife, fish, plants, and birds. Short-term effects, like more jobs, are not worth the long-term effects, like increased illness and asthma rates, increased endangered and extinct species, and polluted drinking sources.

Thank you for considering my comments.
