PLEASE SHARE YOUR COMMENTS BELOW:

I hear much said about the economy in public statements. The bulk terminals by Millennium are bad for many reasons, but the chief among them is anthropogenic global warming. AGW has the potential of tremendous economic impacts. The 5th report by the IPCC states the need to transition from fossil fuel based energy sources to renewables. For God's sake and the sake of my children please reject these terminals and start investing in alternative, renewable sources of energy.

(additional space is provided on the back)

(comment continued)

We have a 95% certainty that AGW is our fault.

We need responsible policy making.
Not more intense use of fossil fuels.
I deplore you to be responsible and
reject these terminals,

Sincerely,
Ken Zimmerman
