My name is Nora and I am but one of many people fighting to preserve this Earth for future generations. We are at a pivotal point in history, and our actions as individuals, counties, states, countries, and as a species must be made in a way that acknowledges the future impacts. The generations to come (of all life forms) have the right to exist. This government ~~is~~ has the responsibility to protect its citizens, and its future citizens, and this means protecting our environment. There is no question about the impacts of coal or coal trains, it is technology that has long been regarded as detrimental to human and ecological health. Yet, I must ask you all to study the impacts of the proposed coal terminal on human and environmental health. It is not just the communities

(additional space is provided on the back)

that the rains will disrupt that will be affected, it is not just the water, and all the wildlife in the area, - the greenhouse gas emissions will contribute to the climate crisis we are facing, and affect the entire world. The actions of corporations that seek profit must be ~~controlled~~ ~~watched~~ ~~closely~~ guided by the people they ~~are~~ ^{are supposed to serve} and controlled by our representatives. Please measure the impact of potential increased greenhouse gas emissions for this project. Please understand that we cannot afford to continue consuming and producing energy in the way that we are now. Please do not allow yourselves to be blinded by immediate dirty job opportunities, ~~we~~ our government must start to create clean energy jobs that do not risk such negative impacts to community and environmental health. How long has it taken for us to realize we are completely and utterly dependent on the ~~air, water, and~~ environment. Protecting the air, water, and ecological systems should be our top priority. "Human environment" and "natural environment" are one in the same. Please ~~and~~ measure the impact of the Millennium Birk Coal Terminal in all of the areas listed, and realize that we are saying NO for a reason. We are drawing the line, because ~~the~~ the future of our planet depends on decisions such as these. There is no ~~is~~ such thing as clean coal, there is no way that these negative, harmful impacts could be mitigated except by denying the permit.

Pida mayaye
Thank you
