In 1982 I was in Beijing. The ^{air} pollution was so bad I could not see across the street.
In the late '80's I worked aboard a research vessel where ^{scientists} studied the effect of carbon on the bottom of the ocean. Folks, this is not new. In the US - every state has worked to get away from coal for a long list of reasons. Why do we have to keep coming back to say No! We have other options, cleaner options. Don't let CHINA burn our ^{dirty} coal!
