

Millennium bulk

In the statement I would like you to investigate what will happen for people with asthma, cancer, and dry eyes and other health problems.

Will the coal export effect traffic congestion, specifically the Lewis and Clark bridge?

Will the emergency medical service be able to get people with medical emergencies to the hospitals throughout all towns the train will travel.

What about noise pollution? The train whistles cause quite a bit of sound.

Will coal have an effect of crops being grown in the area?

What will the pollutants of our air and water do to our quality of life?

What companies are we going to lose because of the export of coal?

What will the diesel fuel used by the trains have on the environment and people?

Will coal export effect ships and other travel on the Columbia River?

What about the coal dust on the travel to Longview, what will it does to towns along the route of the train?

How often will we have to wash out cars, houses and other buildings due to the coal dust?

Will we have to have our cars fixed more often?

Please make an all encompassing environmental impact statement

Will you study the mercury on our watershed—what impact will coal have on it?

What about railroad upgrades and its cost?

What about how coal might drive away businesses to our region?
