

Friends of the Earth

Please join us and tell the U.S. Army Corps of Engineers, WA Department of Ecology, and Cowlitz County Commission that you **oppose** the construction of a **coal export terminal at Longview, WA!**

Dear Decisionmakers:

I strongly oppose the construction of a coal export terminal at Longview, WA which would transport up to 48.5 million tons of coal on trains and ships throughout the Northwest.

This proposal would negatively affect my community by increasing congestion and noise with more coal train traffic, polluting our air and local waterways, harming existing businesses, and delaying emergency responders. It would also damage aquatic ecosystems and fishing areas on the Columbia River, harm human health, increase tanker traffic and the potential for shipping accidents and coal and fuel spills, expand strip-mining in Wyoming and Montana, and escalate climate change.

I urge you to consider these impacts in the scope of the Environmental Impact Statement.
