Millennium Bulk Terminals EIS
c/o ICF INTERNATIONAL
710 Second Avenue, Suite 550
Seattle, WA 98104

Dear Sirs and Madams:

Please include these comments from people of faith across Washington State in the scoping process for the proposed Longview coal export terminal.

As people of faith, we believe we are called to be stewards of God's Earth. We see it as our moral duty to protect and care for our planet, so that future generations can benefit from this gift as much as we have.

Allowing the proposed coal export terminal at Longview to be built would directly contradict our values. It would lead to further degradation of the environment, thereby increasing the burden that is already being felt by thousands of God's children across the globe. In addition, it will prevent our children from inheriting a healthy and vibrant planet.

These are but two of the many concerns found on these 232 postcards. We ask that you read them all and take our comments into account as you study the environmental impact of the Longview coal export terminal. Please include all of the potential impacts listed in both the printed and handwritten portion of these postcards in the official scoping process. Thank you.

Yours,

LeeAnne Beres
Executive Director
