

NO COAL EXPORTS FROM NORTHWEST PORTS

Dear Commissioner Goldmark:

Thank you for your strong leadership in protecting Washington's land and clean water. We, the undersigned, strongly oppose the construction of coal export terminals in Washington that would pollute the air we breathe and the water we drink. Washingtonians are committed to investing in clean, renewable energy and a healthier planet. Building coal export terminals would undercut our state's efforts to reduce global warming pollution and provide leadership on climate issues. I urge you to use your full authority to prevent Washington from becoming a gateway for dirty coal around the world. ***Please print clearly***
