

Missoula/BZN

Coal Export: Montana Matters!

As Montana citizens who would be impacted by proposals to ship Powder River Basin coal to Asia via West Coast ports, we demand that our communities do not bear the costs of coal export. These costs could include:

- Financial burdens on taxpayers for necessary infrastructure upgrades
- Inconvenience and threats to public safety from traffic delays at rail crossings
- Negative health impacts from diesel fumes, coal dust, and noise
- Adverse effects on Montana's air and water quality

We call on the Army Corps of Engineers and the Surface Transportation Board to fully analyze ALL impacts of these projects, and make decisions that will benefit Montana communities, not corporate profits.
