

NO COAL EXPORTS FROM NORTHWEST PORTS

Dear Governor Jay Inslee, Army Corps of Engineers, and Senators Cantwell and Murray:

Currently, there are four proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. Given the significant impacts to air, water, climate, human health, business and our communities, an Environmental Impact Statement *must* be prepared for each individual project. And the federal agencies involved should conduct an in-depth area-wide environmental review that considers impacts from all projects from mine to power plant, *prior* to any permits being issued.

I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. Given the significant impacts to air, water, climate, human health, business and our communities, an Environmental Impact Statement *must* be prepared for each individual project. And the federal agencies involved should conduct an in-depth area-wide environmental review that considers impacts from all projects from mine to power plant, *prior* to any permits being issued.

NO COAL EXPORTS FROM NORTHWEST PORTS

Dear Governor Jay Inslee, Army Corps of Engineers, and Senators Cantwell and Murray:

Currently, there are four proposed coal terminals in Washington and Oregon that would export millions of tons of coal through our communities. I am concerned about the local impacts to my community from dirty coal, as described by the EPA, but also to the effect on our region as a whole. Given the significant impacts to air, water, climate, human health, business and our communities, an Environmental Impact Statement *must* be prepared for each individual project. And the federal agencies involved should conduct an in-depth area-wide environmental review that considers impacts from all projects from mine to power plant, *prior* to any permits being issued.
