- Marine Species, Fish, or Fisheries
- Wetlands or Streams
- Water Quality
- Other Natural Environment Topic

EIS Process

- Alternatives
- EIS Regulatory Process
- Other EIS Process Topic

PLEASE SHARE YOUR COMMENTS BELOW:

I believe the decimation of the earth for coal and all natural resources is leaving a huge problem for future generations. Why would we strip the Earth in the United States to ship coal to China? The entire process will pollute the air, with the noise and air quality. Not simply from going through Cowlitz County but every place that air passes through. Humans and other animals

(additional space is provided on the back)

(comment continued)

alone will suffer the consequences.
Furthermore, why are we (working class people) anxious to ship coal to China? Industry and government have already shipped our factories and jobs there, now we the working class are being asked to support the loss of those same jobs by supplying coal to China.
